

# Create a Child Student Set

---

Last Modified on 01/06/2016 3:13 pm EST

## Create a Child Student Set of a Previously-Created Parent Student Set

To create a "child" Student Set of a previously-created "parent" Student Set, select option 3., choose the "parent" Student Set from the dropdown menu, and click the "Next" button. Please note, only Student Sets that you have designated as "parent" Student Sets will be displayed in the dropdown menu.

If you would like to create a "child" Student Set of another instructor's "parent" Student Set (it must be the same textbook for this to work properly), select option 3., choose "Create a child of another instructor's parent Student Set" from the dropdown menu, enter the Student Set ID number of the "parent" Student Set in the field that appears to the right of the dropdown menu, and click the "Next" button.

1. "CHILD OF" will be added to the beginning of the "parent" Student Set's title. Please feel free to modify the title to fit your needs for this new Student Set.
2. Enter your school's internet domain name (the information to the right of the "@" symbol in your school email address). After you fill in this information the first time, this field should be automatically filled-in the next time you create a new Student Set.
3. Click on the "Start date:" field and a calendar will appear. Select a start date for the Student Set you are creating. You can also enter the start date manually by using this format: MM/DD/YYYY.
4. Click on the "End date:" field and select an end date for the Student Set.
5. Click on the "Cancel" button to close this window and return to the "Manage Student Sets" window without creating a new Student Set.
6. Click on the "Back" button to return to the previous screen to select a different method for initializing your Student Set.
7. Click on the "Create Student Set" button to create a Student Set using the information you provided.

Even though this is a "child" Student Set of another "parent" Student Set, your new "child" Student Set will be assigned a new, unique Student Set ID number. This is the five-digit number that you should give to your students so that they can join this specific Student Set. Click on the "OK" button to close the message window and return to the "Manage Student Sets" window.
