

Filtering Questions

Last Modified on 08/07/2020 11:51 am EDT

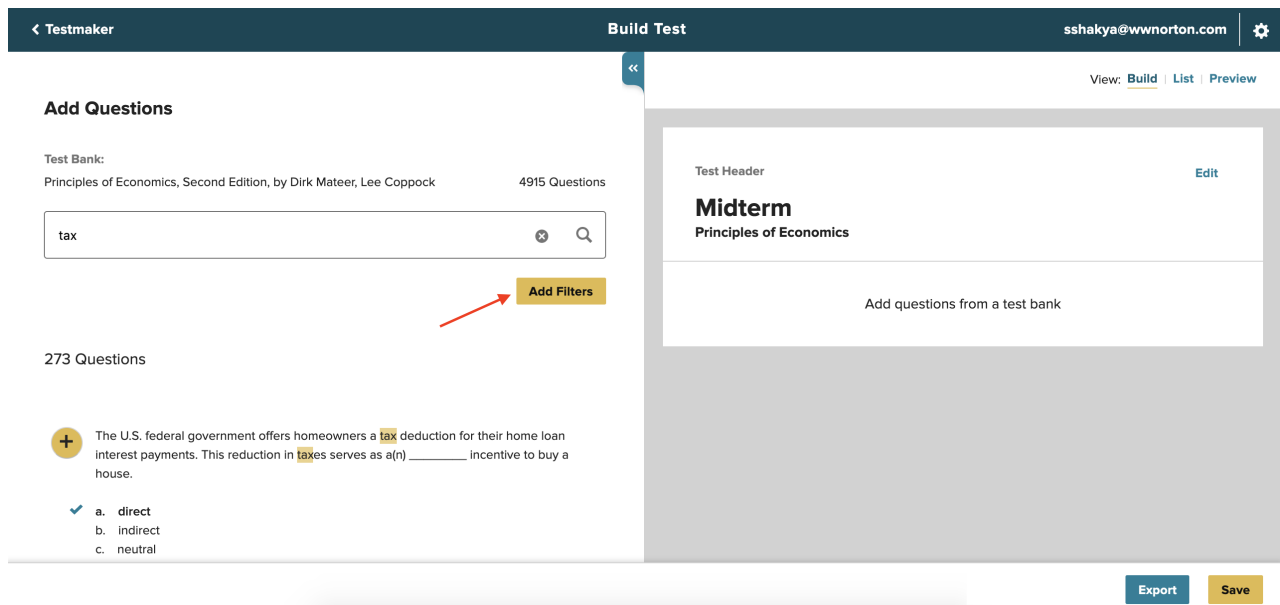

Norton Testmaker allows question filtering using bank-specific metadata. Questions will not be displayed in the "Add Questions" panel until a search and/or filters are applied. You can use filters to narrow your search results. Some commonly available filters include:

1. Chapters
2. Question Types
3. Difficulty
4. Learning Objectives
5. Bloom's Taxonomy

Filtering questions after search result

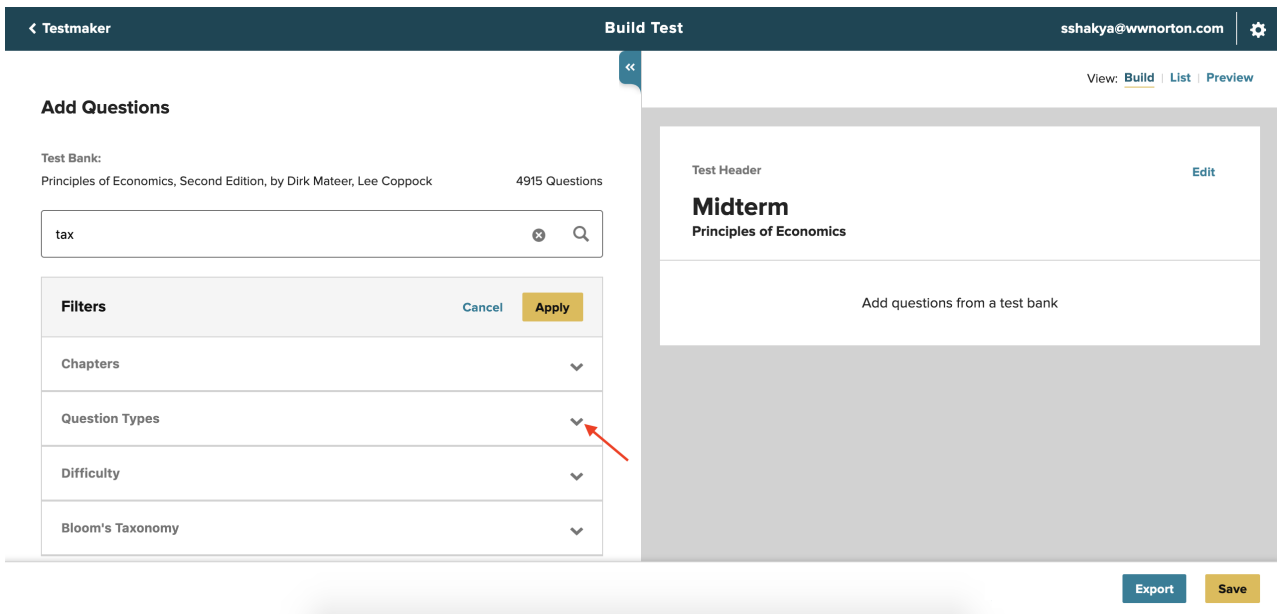

Questions can be filtered even after a text search.

1. Click the "Add Filters" button.

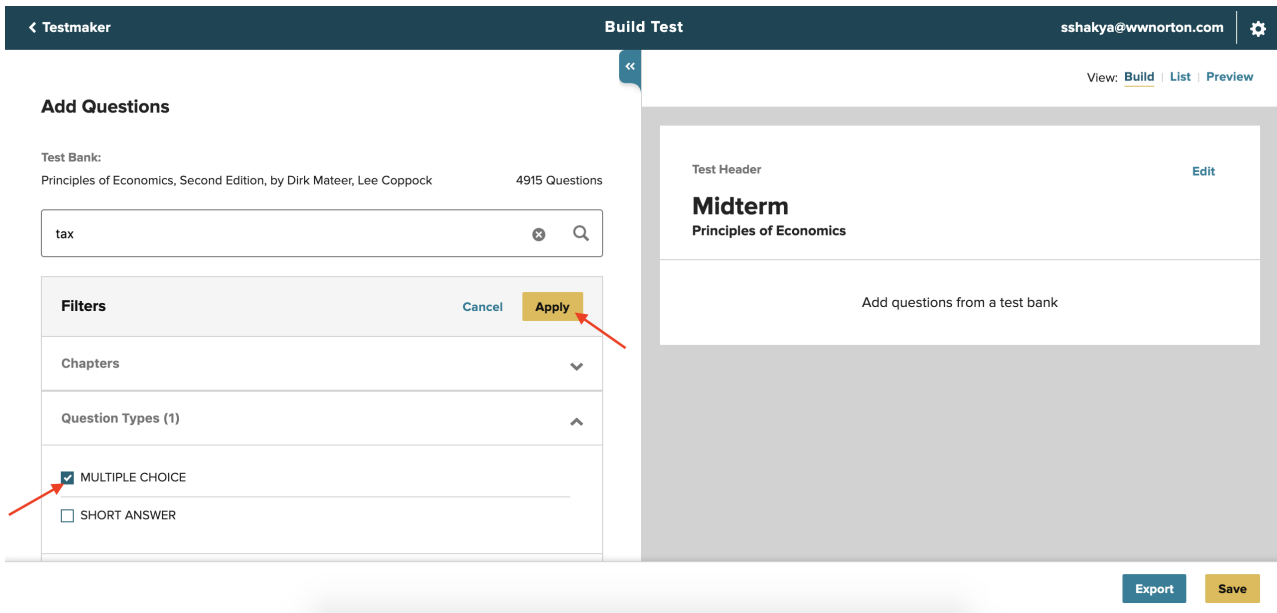

The screenshot displays the Norton Testmaker interface. On the left, the 'Add Questions' panel shows a search for 'tax' in the 'Principles of Economics, Second Edition, by Dirk Mateer, Lee Coppock' test bank, which contains 4915 questions. The search results show 273 questions, with the first one selected: 'The U.S. federal government offers homeowners a tax deduction for their home loan interest payments. This reduction in taxes serves as a(n) _____ incentive to buy a house.' The options are a. direct, b. indirect, and c. neutral. A red arrow points to the 'Add Filters' button. On the right, a preview of the test question is shown, titled 'Midterm Principles of Economics', with an 'Add questions from a test bank' button. The interface includes a top navigation bar with 'Testmaker', 'Build Test', and 'sshakya@wnorton.com'.

2. Expand the filter category you're interested in.

3. Select the desired filter(s) and click the “Apply” button. You can apply more than one filter.

4. Questions will be filtered per filter selection. Selected filter(s) will be displayed above the search result count. Filter(s) can be removed by clicking the "X" icon inside each filter box.

The screenshot shows the 'Testmaker' interface. At the top, there's a navigation bar with 'Testmaker', 'Build Test', and 'sshakya@wnnorton.com'. Below this, the 'Add Questions' panel is active. It shows the test bank 'Principles of Economics, Second Edition, by Dirk Mateer, Lee Coppock' with 4915 questions. A search box contains the word 'tax'. Below the search box, there are 'Clear Filters' and 'Add Filters' buttons. A filter category 'MULTIPLE CHOICE' is expanded, with a red arrow pointing to it. Below the filter, it shows '207 Questions' and a sample question about a tax deduction. The question is: 'The U.S. federal government offers homeowners a tax deduction for their home loan interest payments. This reduction in taxes serves as a(n) _____ incentive to buy a house.' The answer 'a. direct' is selected. On the right, a preview pane shows the test header 'Midterm Principles of Economics' and a message 'Add questions from a test bank'. At the bottom right, there are 'Export' and 'Save' buttons.

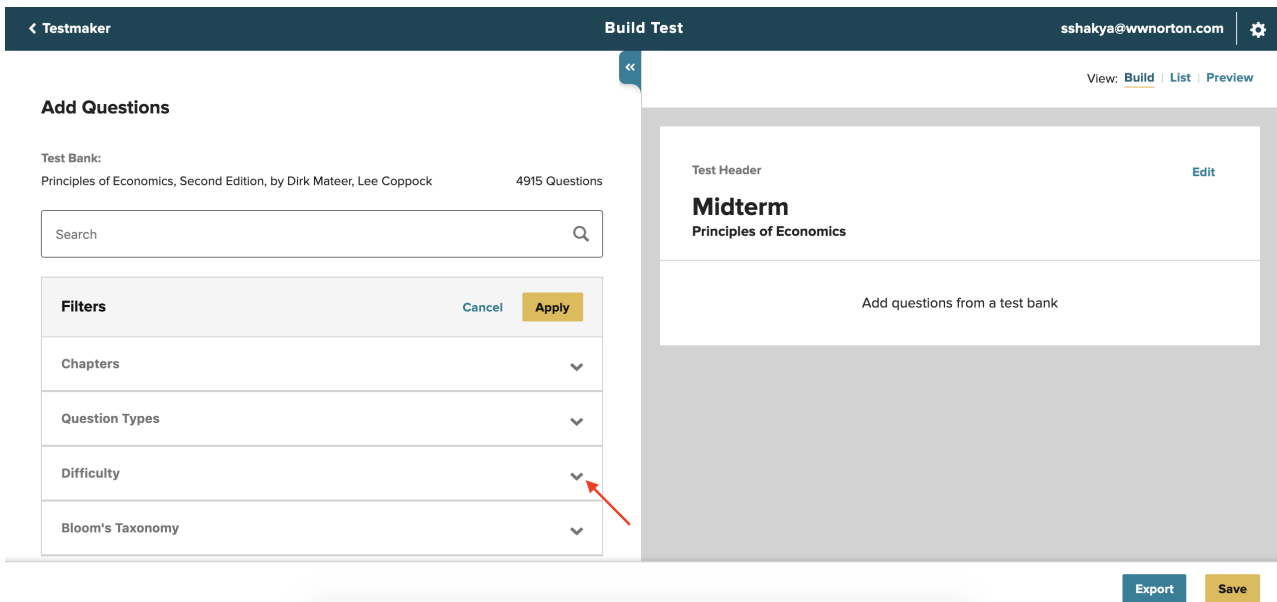

Filtering questions without search

You can filter questions by filter categories without first searching the questions.

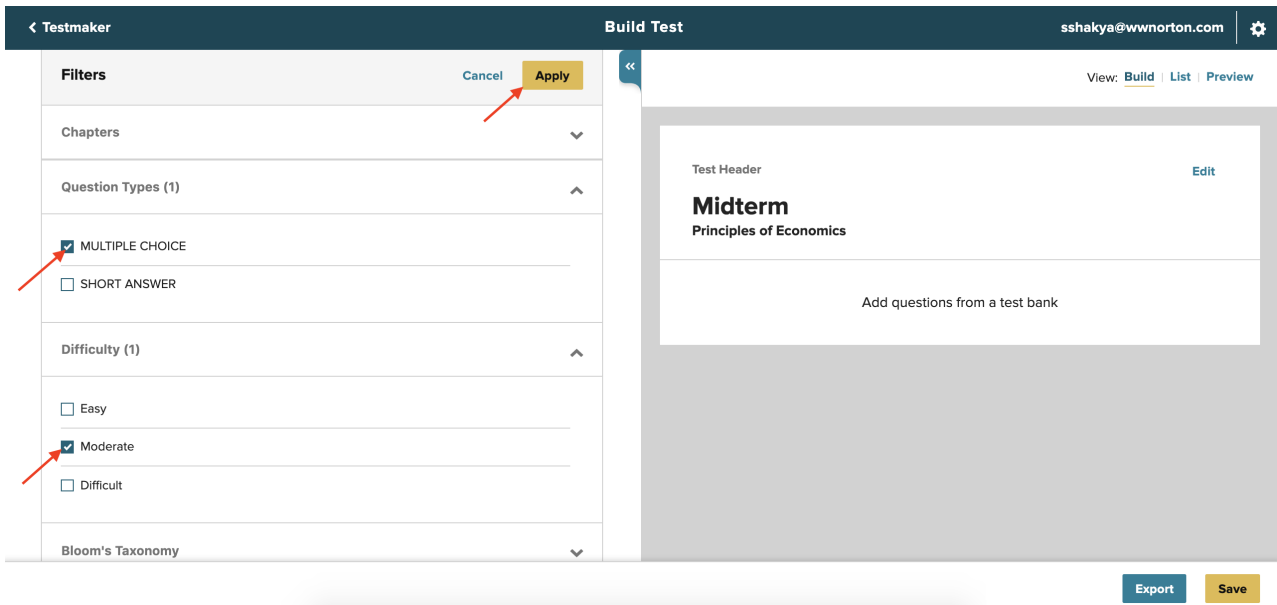

1. Click the “Add Filters” button.

This screenshot is similar to the first one, but the search box is empty and contains the word 'Search'. The 'Add Filters' button is highlighted in yellow, and a red arrow points to it. The rest of the interface, including the test bank information, the sample question, and the preview pane, remains the same.

2. Expand the filter category you're interested in.

3. Select the desired filter(s) and click the “Apply” button. You can apply more than one filter.

4. Questions will be filtered per filter selection. Selected filter(s) will be displayed above the search result count. Filter(s) can be removed by clicking the "X" icon inside each filter box.
