

Digital Landing Page Course Setup (no LMS Integration)

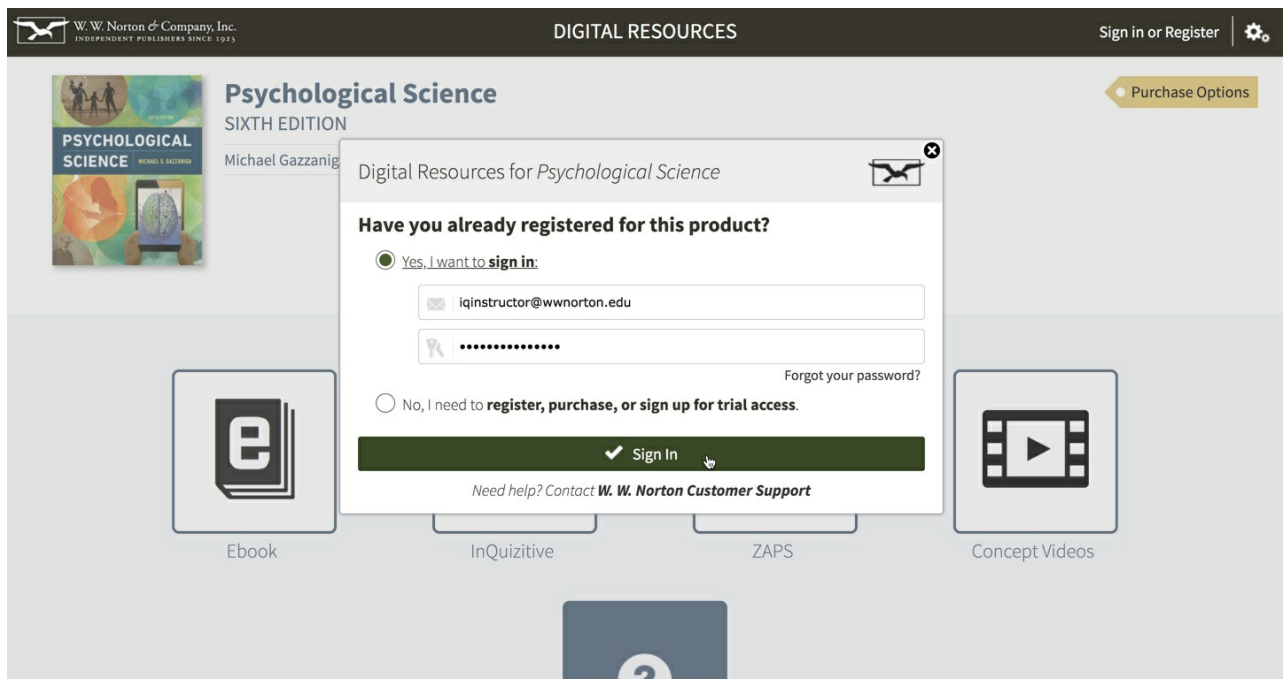

Last Modified on 07/25/2024 12:33 pm EDT

Getting started with Norton digital products—ebooks, InQuizitive, Smartwork, and more—is easy. This article provides instructions for setting up a course using Norton's Digital Landing Pages. Instructors who wish to integrate their Norton digital products with their school's Learning Management System (LMS) should visit the help notes on [LMS Integration](#).

Hide All Answers

How do I access Norton digital products?

Log in to your textbook's digital resources page using your email address and Norton instructor account password.

The screenshot shows the Norton Digital Resources page for the textbook "Psychological Science, Sixth Edition" by Michael Gazzaniga. The page features a navigation bar with the Norton logo, "DIGITAL RESOURCES", and "Sign in or Register" with a settings icon. Below the navigation bar, the textbook cover is displayed on the left, and a "Purchase Options" button is on the right. A central modal window titled "Digital Resources for Psychological Science" asks, "Have you already registered for this product?". It offers two options: "Yes, I want to sign in:" (selected) and "No, I need to register, purchase, or sign up for trial access." The "Yes" option includes a text input field for the email address "iqinstructor@wnnorton.edu" and a password field with a "Forgot your password?" link. A green "Sign In" button is at the bottom of the modal, with a link to "Need help? Contact W. W. Norton Customer Support" below it. At the bottom of the page, there are icons for "Ebook", "InQuizitive", "ZAPS", and "Concept Videos".

Don't have a password? Visit <https://wnnorton.com/educator>. Once on the site, choose College or High School and go to the discipline menu on the left. Find your book's instructor resource page, and request instructor account access.

What are Student Sets?

A Student Set is your class section. Student Sets allow you to view the results of the work completed by a particular group of students.

There are two ways for you to create a Student Set: from scratch or by copying an existing Student Set to create a new Student Set.

Basing your Student Set on an existing Student Set allows you to copy any assignments and settings that you've used

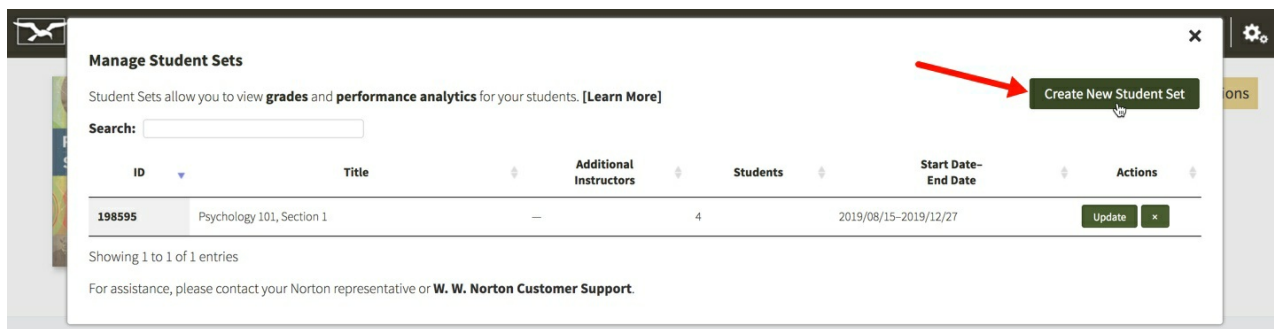

in one Student Set into another Student Set. You may want to create a Student Set based on an existing Student Set if you are teaching multiple sections of the same course. Furthermore, if you and another instructor are both teaching different sections of the same course, you have the option to base your Student Set on the other instructor's Student Set by using the copy function.

How do I create a new Student Set?

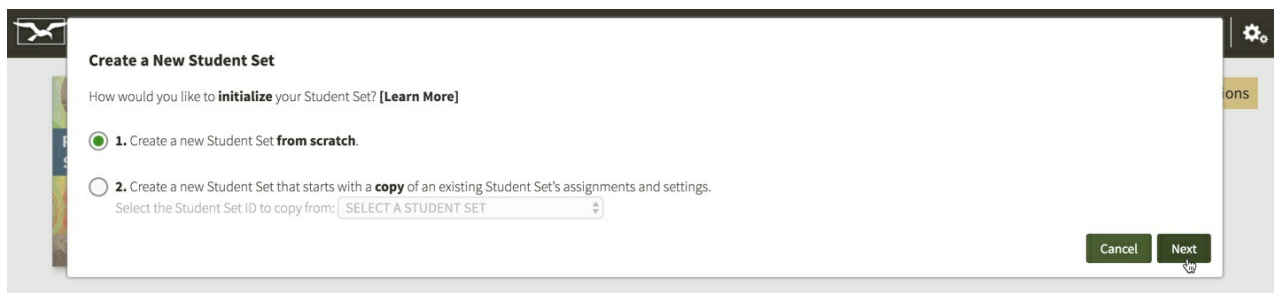

Click on the gear menu in the upper-right corner of the Digital Resources page and select Manage Student Sets from the menu.

Click the Create New Student Set button.

Select the type of Student Set you would like to create and click the Next button.

Enter a title for your Student Set; select your state, province, or country; start typing your school's name into the field that appears and select your school from the list; set a start and end date for the Student Set; and finally, click the Create Student Set button. Make a note of the Student Set ID number and distribute it to your students.*

How do I add a Co-Instructor, Scoring Teaching Assistant, or Teaching Assistant to my Student Set?

In all Norton digital products, you can add a Co-instructor, a Scoring Teaching Assistant, or a Teaching Assistant to your Student Set. Each role has a different set of permissions. Click on your product to see a complete list of role permissions for Teaching Assistants, Scoring Teaching Assistants, and Co-Instructors.

- [Norton Ebook Reader](#)
- [InQuizitive](#)
- [Smartwork](#)
- [ZAPS 2.0](#)
- [Digital Landing Page](#)

Note: Adding a TA or STA to your Student Set will not grant that account access to the associated product(s); the TA or STA will still need to register or purchase access to be able to use the Digital Resources for your textbook.

Click the gear menu at the upper-right of the page and select Manage Student Sets from the menu.

In the Role dropdown menu, select the permission level you would like to give the person you are adding to your Student Set. (For a comparison of the four different roles, please see the Overview of Role Permission links above.) Type in the person's email address and click the Lookup button.

1. If you are adding a co-instructor, the person must have a Norton account with full instructor privileges. For help with this, please contact Norton Customer Support.
2. If you are adding a Scoring TA or TA, the person does not need to have a pre-existing Norton account. In the case that they do not have a Norton account, we will send them an email with log in instructions once you add them to your Student Set.
3. **Note:** If you are adding a student as a Scoring TA or TA, you are changing their permissions in all Norton

products. If they are enrolled as a student in another Student Set, please have them register with a **separate email address** when logging in as a TA or a Scoring TA.

4. Once you give an account a specific level of permission in your Student Set, you cannot downgrade that account to a lower permission level. For example, if you give an account Scoring TA access, you cannot downgrade that account to TA access. If you need assistance with downgrading a TA or STA in your Student Set, please contact Norton Customer Support.

The screenshot shows the 'Update Student Set 31278' interface. The 'General Information' section includes fields for Title, School Name, and Start/End Dates. The 'Assignments and Settings' section shows a table with columns for Product and Assignments. A modal dialog box titled 'Add New Member to Student Set' is open, featuring a 'Role' dropdown menu set to 'Scoring Teaching Assistant', an 'Email Address' field containing 'iqsta@wwnorton.edu', and a 'Lookup' button. Red arrows highlight the role dropdown, the email address field, and the 'Lookup' button. The dialog also includes 'Cancel' and 'Add' buttons at the bottom.

Click on the Add button to add the co-instructor, Scoring TA, or TA to your Student Set.

When you are finished updating your Student Set, click on the Save button in the lower-right corner to save your changes.

How do I remove Co-Instructors, Scoring TAs, or TAs from my Student Set?

Click the gear menu at the upper-right of the page and select Manage Student Sets from the menu.

Click the Update button to the right of the Student Set from which you would like to remove a co-instructor, Scoring TA, or TA.

Click on the Update button to the right of the Student Set in which the students are currently enrolled.

All of the students in the Student Set are listed here.

In the Update Student Set overlay, you can easily view whether students in your Student Set have obtained an entitlement to digital products associated with your Student Set or not. The Access Until column allows you to view the date through which the student has access to the associated entitlement. The Access Granted column displays information related to the type of entitlement the student currently has.

1. Trial Only: The student is currently registered for 21 days of trial access to the digital product associated with your Student Set.
2. (Rare) Trial Only [Removed]: The student registered for 21 days of trial access to the digital product associated with your Student Set and the entitlement was removed from their account by a Norton administrator.

3. Trial Access [Expired]: The student had 21 days of trial access to the digital product associated with your Student Set and the entitlement is past the end date.
4. Yes: The student has registered an access code or purchased access to the digital product associated with your Student Set.
5. Yes [Removed]: The student has registered an access code or purchased access to the digital product associated with your Student Set and the entitlement was removed from their account by a Norton administrator. This is typically seen when a student has opted out in an Inclusive Access course.
6. Yes [Expired]: The student has registered an access code or purchased access to the digital product associated with your Student Set and the entitlement is past the end date.
8. No: The student has no entitlement to the digital product associated with your Student Set but is in the Student Set.

*Please note you cannot make changes to the Access Granted and Access Until information for the students.

Are there any how-to videos available?

Yes, indeed! Here are some videos to help both you and your students get started.
