

# Enabling Cookies within Internet Browsers

Last Modified on 01/22/2025 4:10 pm EST

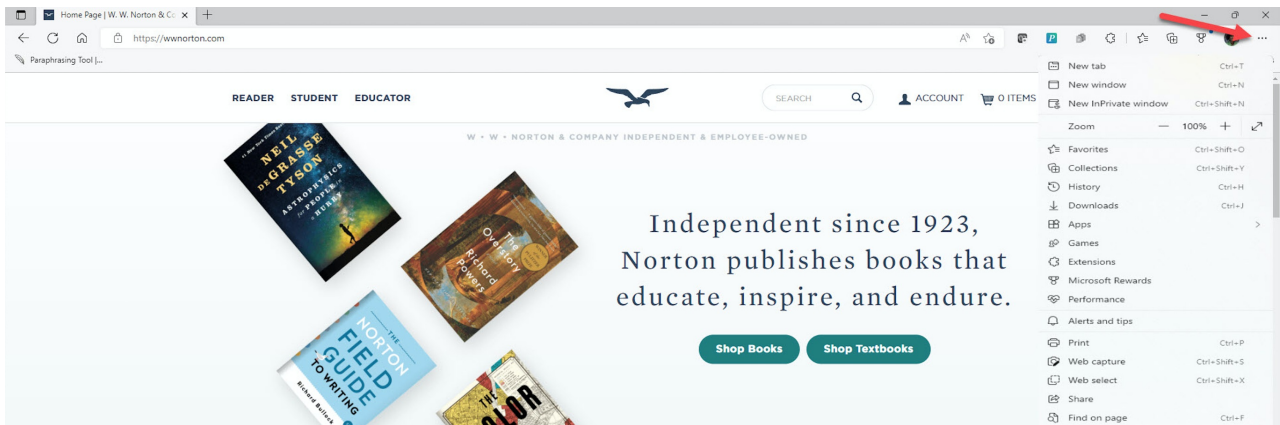

This page will guide you through the steps of how to enable cookies within your internet browser. Most of Norton's digital products require cookies to be enabled to ensure that they function properly. Click on the link below that matches the operating system and internet browser you are using to view customized instructions on how to enable cookies.

Don't know which Internet browser you're using? [Click here.](#)

## Windows/Microsoft Edge

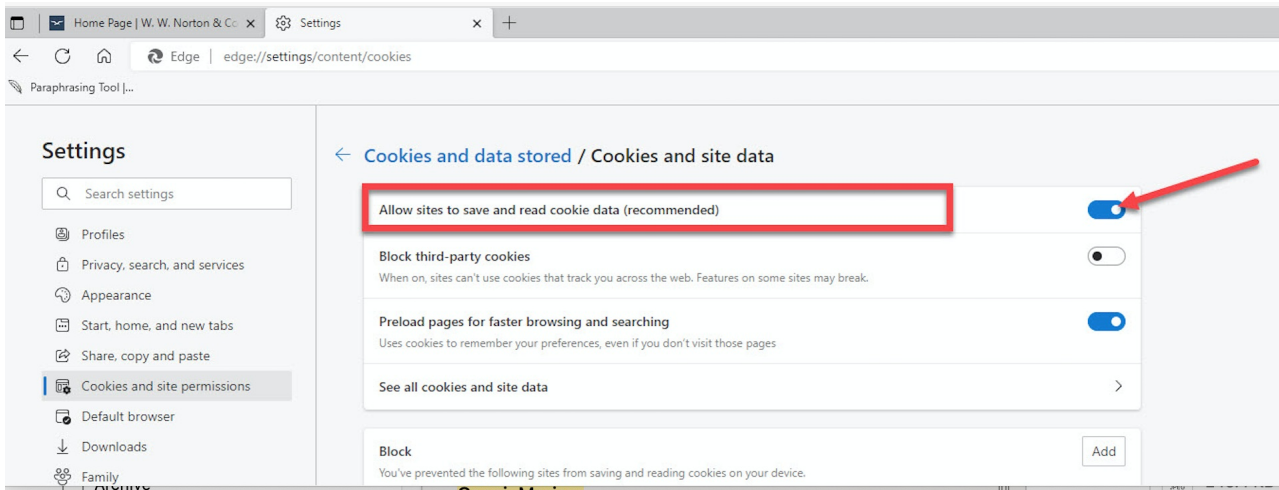

Click on the menu icon in the upper-right corner of the window.

Select Settings, Cookies and Site Permissions and then click on Manage and delete cookies and site data

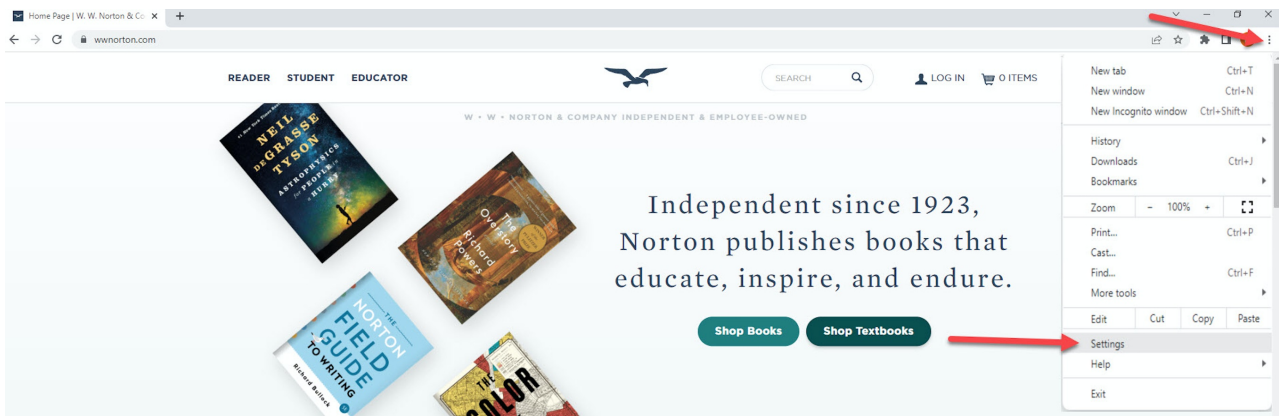

Make sure **Allow sites to save and read cookie data (recommended)** is turned on as shown in screenshot.

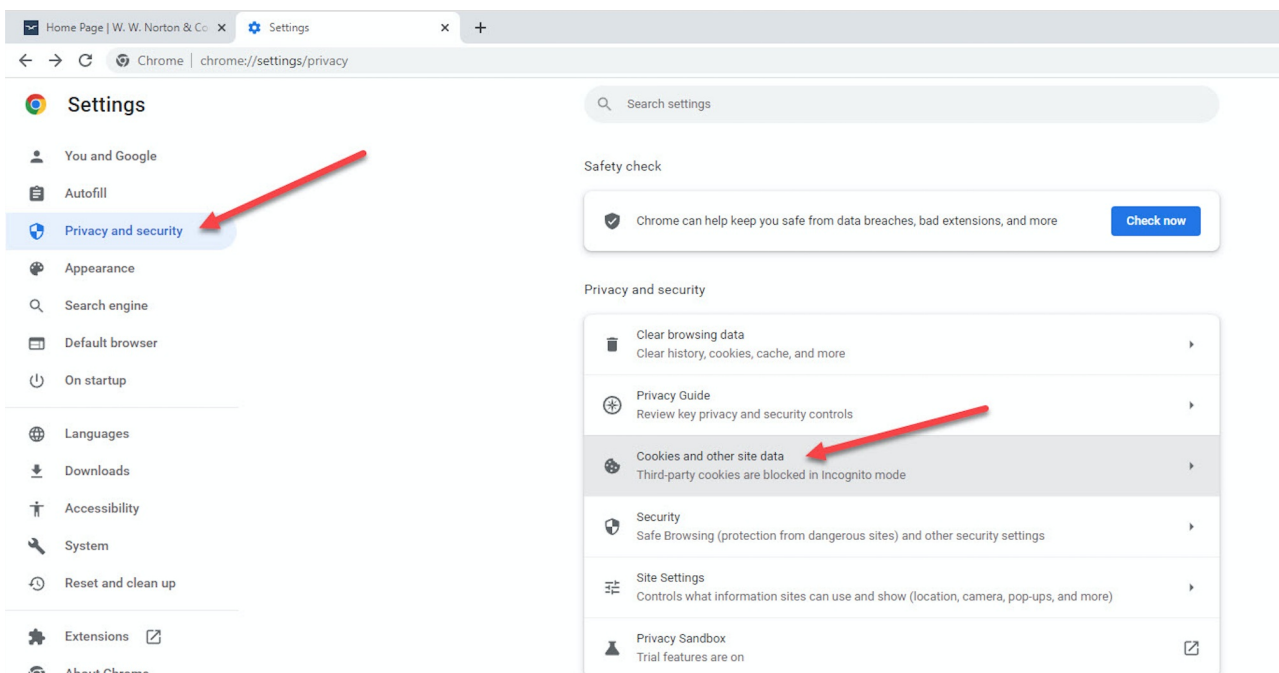

## Windows/Chrome

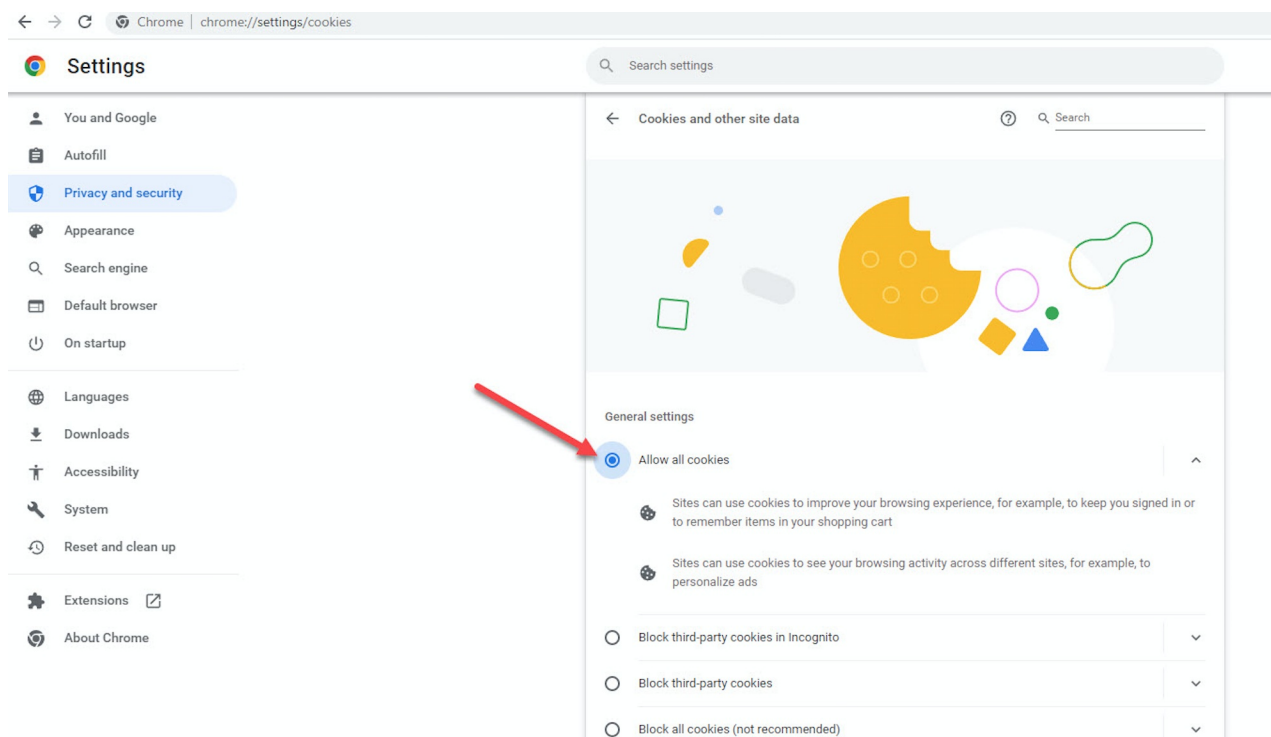

Click on the menu icon in the upper-right corner of the window and select Settings from the menu.

Select Privacy and Security and then click on Cookies and other site data

Under General Settings, select Allow all cookies as shown in screenshot.

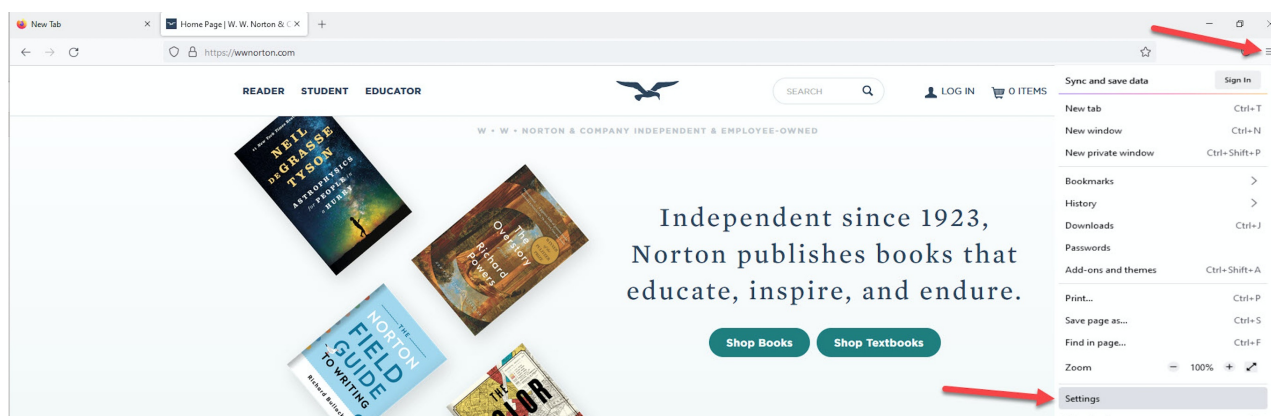

## Windows/Firefox

Firefox blocks most third-party tracking cookies by default.

Follow these steps to enable cookies:

Click on the menu icon in the upper-right corner of the window and click on Settings

Select Privacy & Security

Find in Settings

#### Enhanced Tracking Protection

Trackers follow you around online to collect information about your browsing habits and interests. Firefox blocks many of these trackers and other malicious scripts. Manage Exceptions...

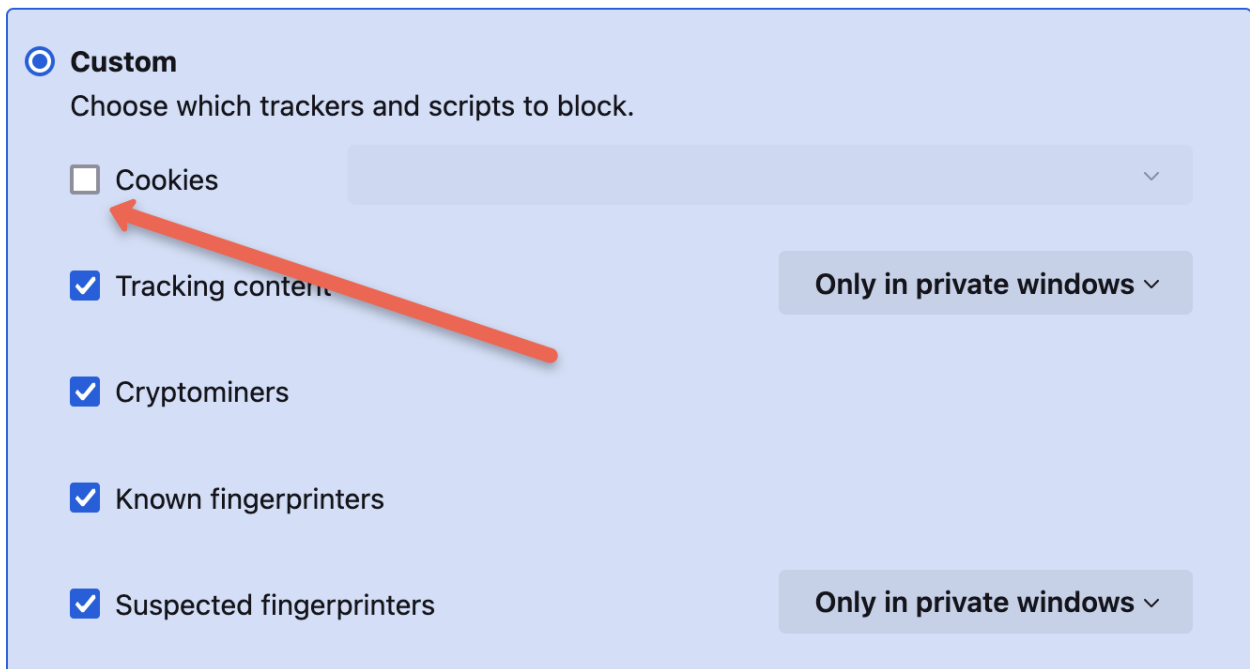

[Learn more](#)

- Standard  
Balanced for protection and performance. Pages will load normally.
- Strict  
Stronger protection, but may cause some sites or content to break.
- Custom  
Choose which trackers and scripts to block.

- Cookies Cross-site tracking cookies
- Tracking content Only in private windows
- Cryptominers
- Known fingerprinters
- Suspected fingerprinters Only in private windows

Extensions & Themes

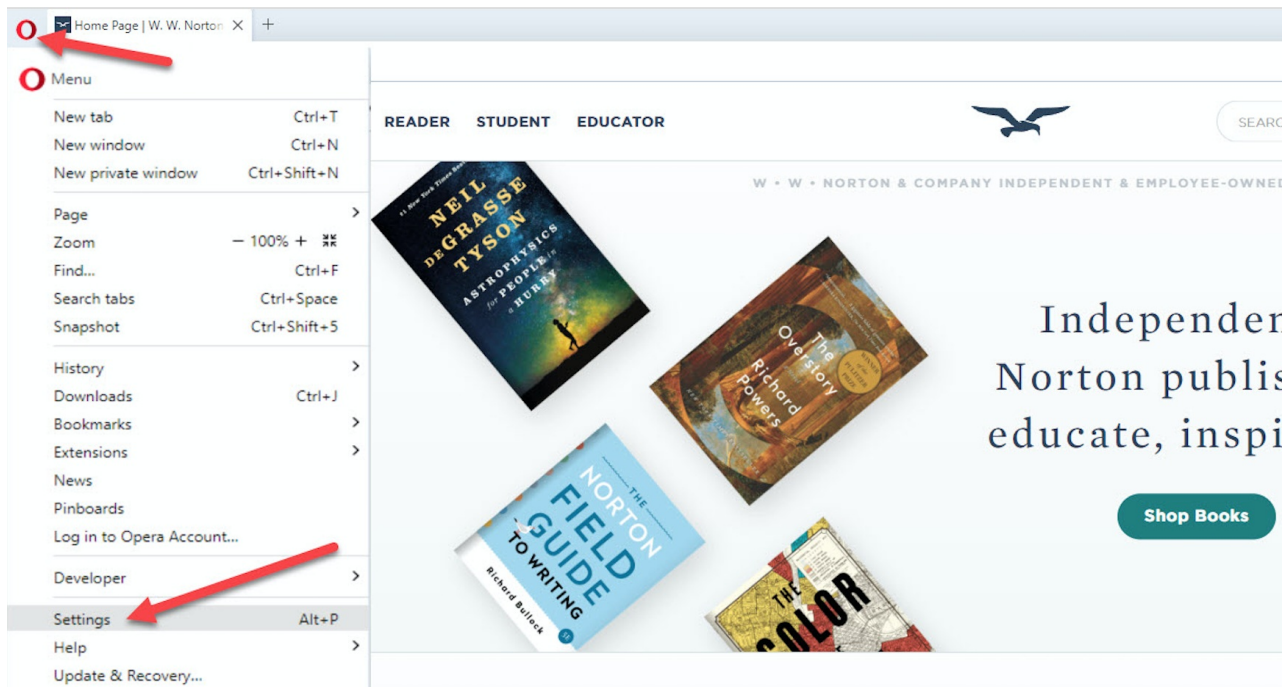

Uncheck the box next to Cookies

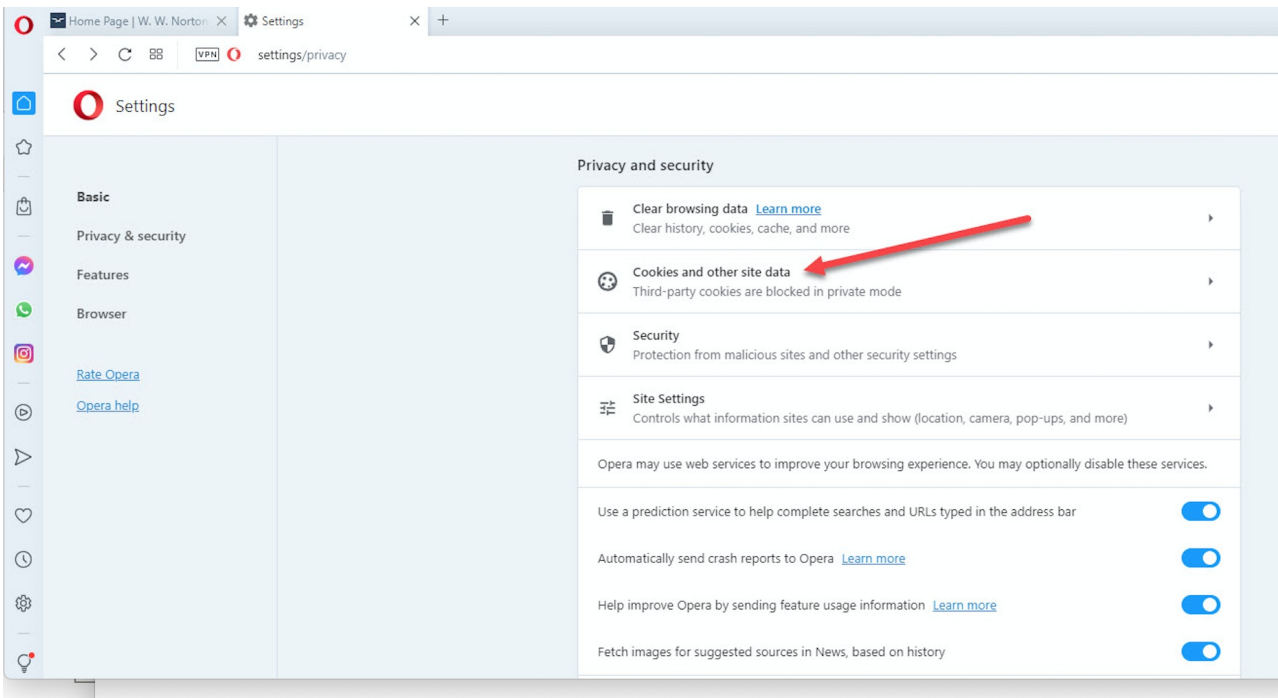

**PLEASE NOTE:** You will need to reload your browser tabs to apply settings changes.

## Windows/Opera

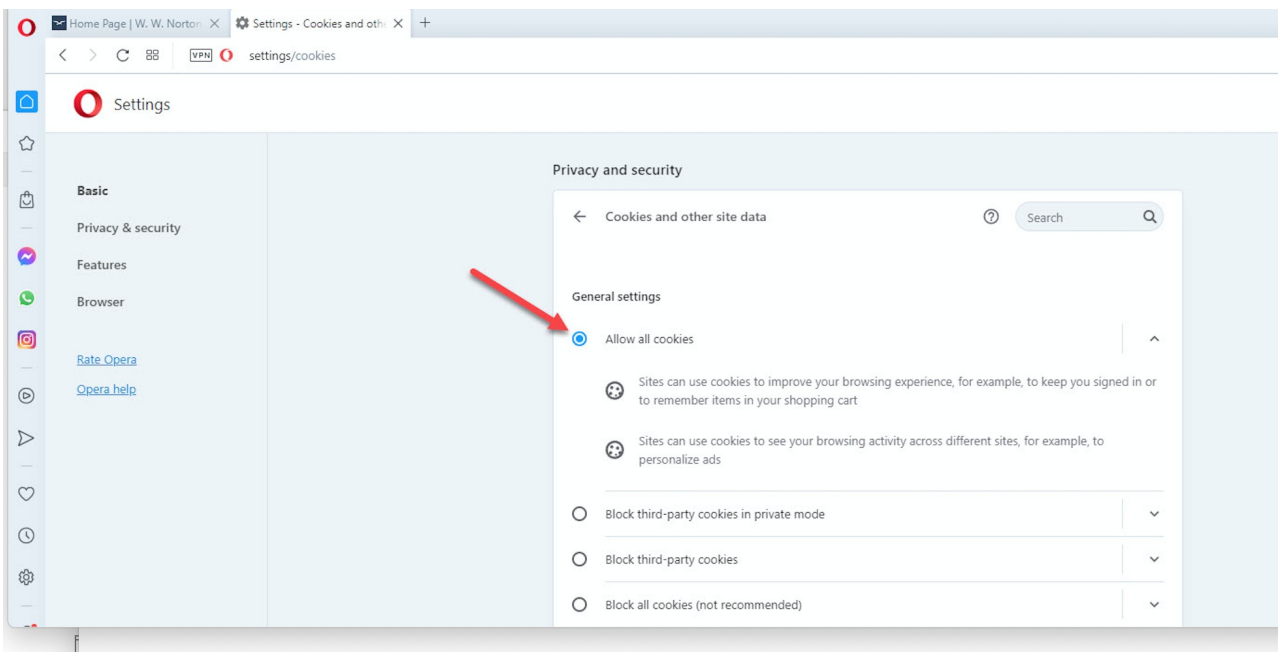

Click on the Opera menu in the upper-left corner of the window and select Settings from the menu.

Select the Privacy & security, and then select Cookies and other site data

Under General Settings, select Allow all cookies

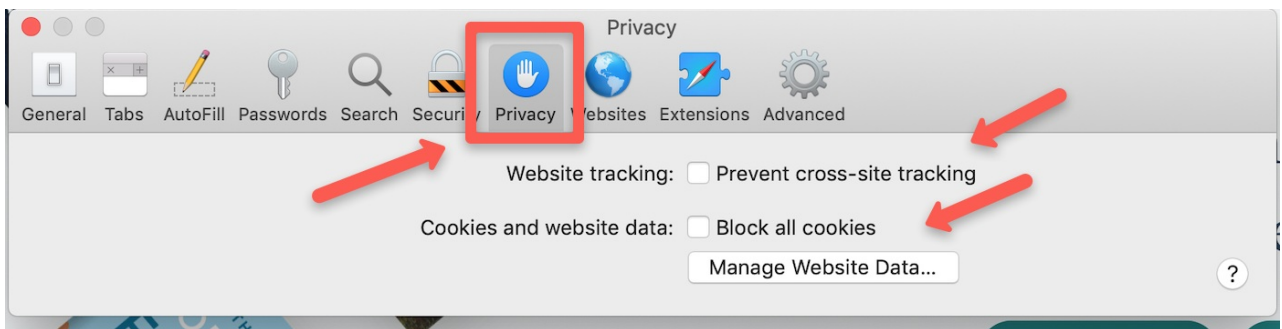

## Mac/Safari

Click on the Safari menu in the upper-left corner of the screen and select Preferences from the menu.

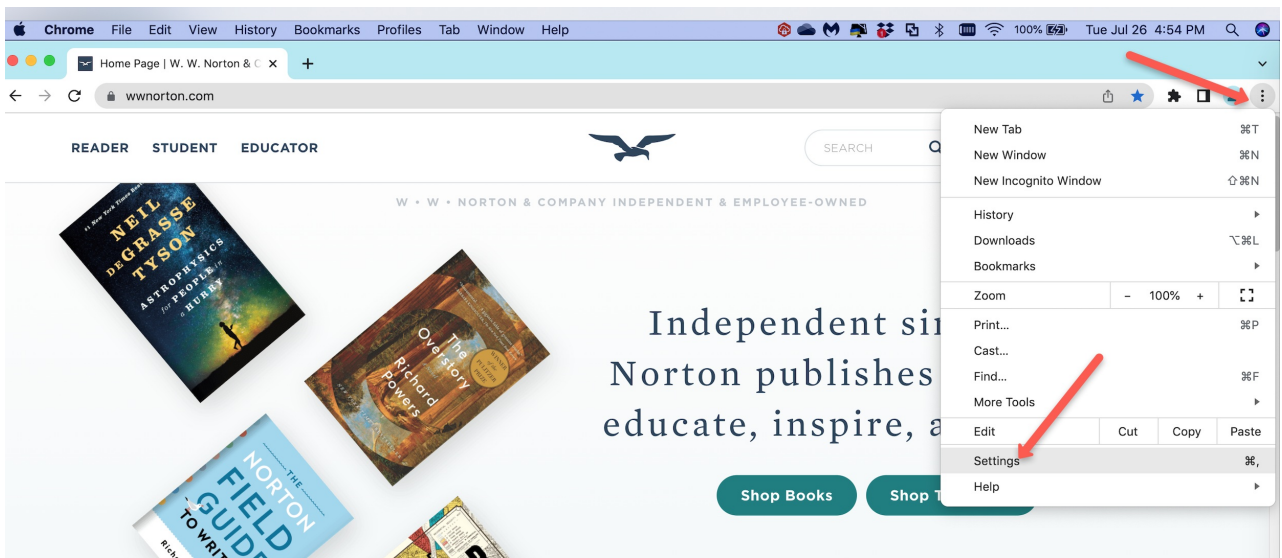

Select the Privacy tab and make sure Website tracking and Cookies and website data do not contain checkmarks as shown in the screenshot example below:

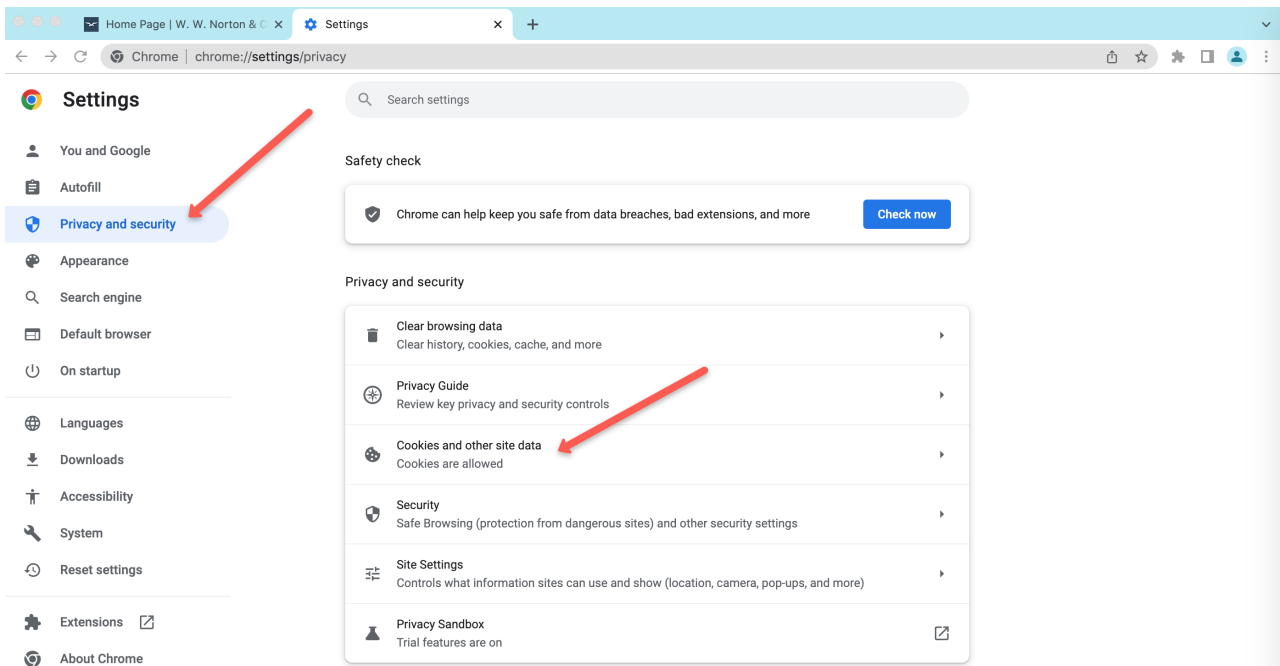

## Mac/Chrome

Click on the menu icon in the upper-right corner of the window and select Settings from the menu.

Select Privacy and security and then click on Cookies and other site data

Under General Settings select Allow all cookies. Block third-party cookies should be turned off as shown in screenshot below:

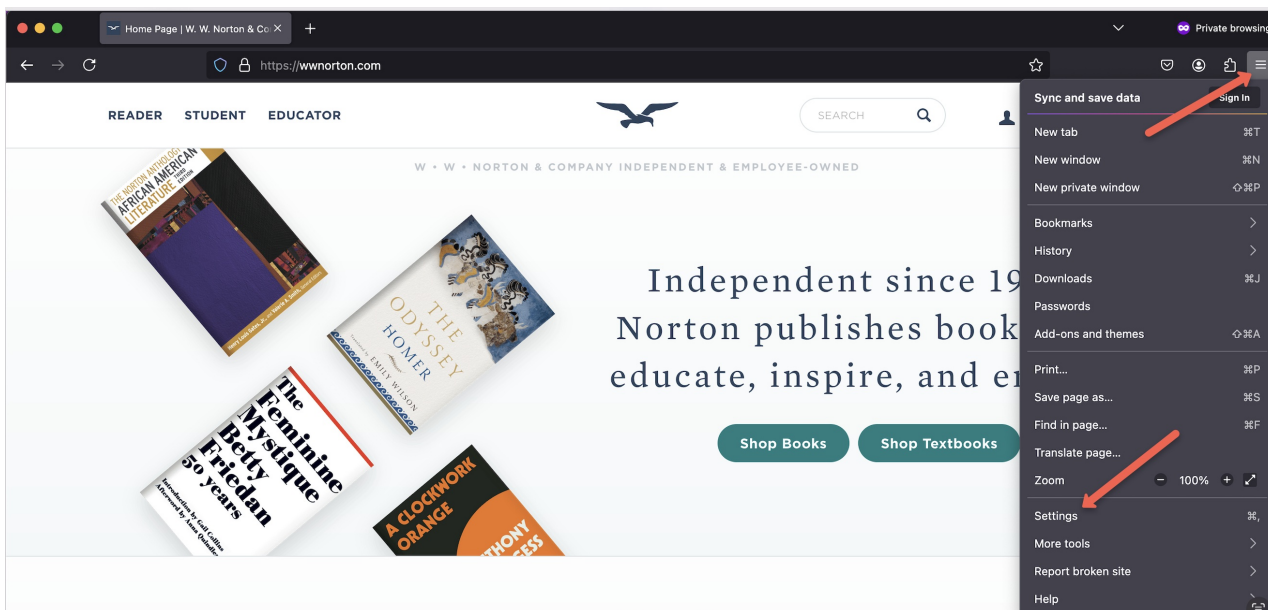

## Mac/Firefox

Firefox blocks most third-party tracking cookies by default.

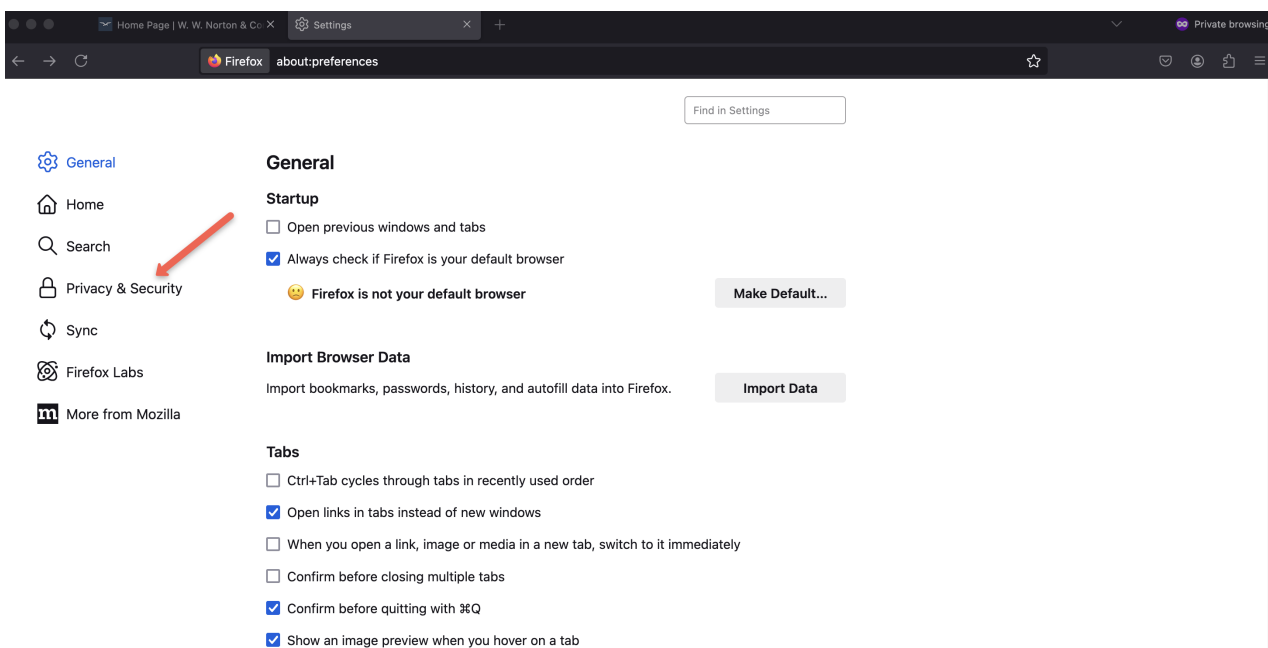

Follow these steps to enable cookies:

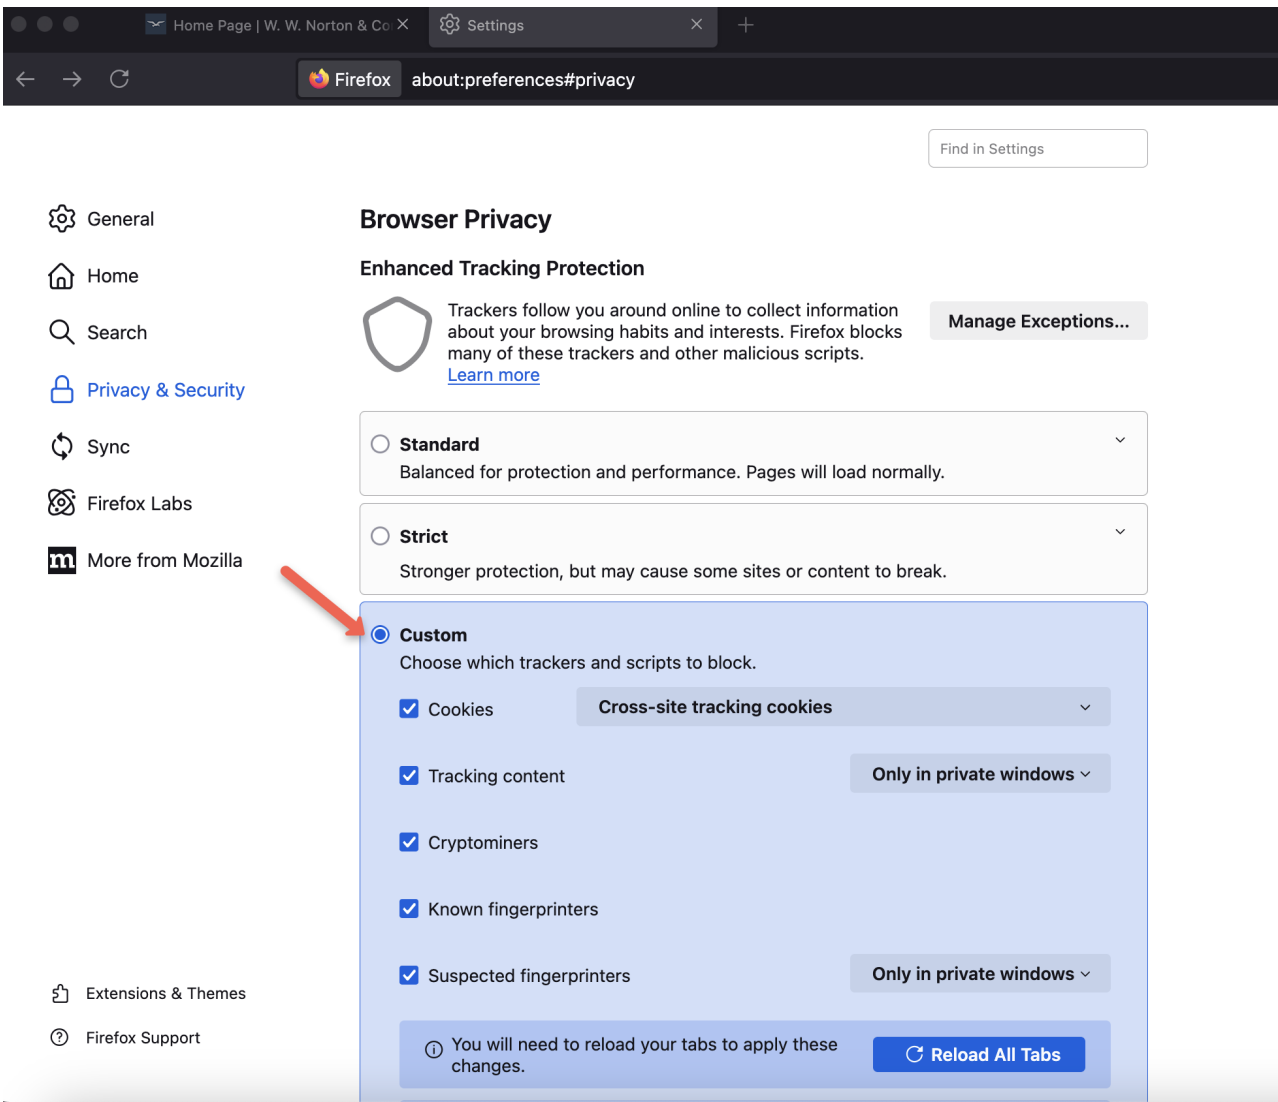

Click on the menu icon in the upper-right corner of the window and select Settings.

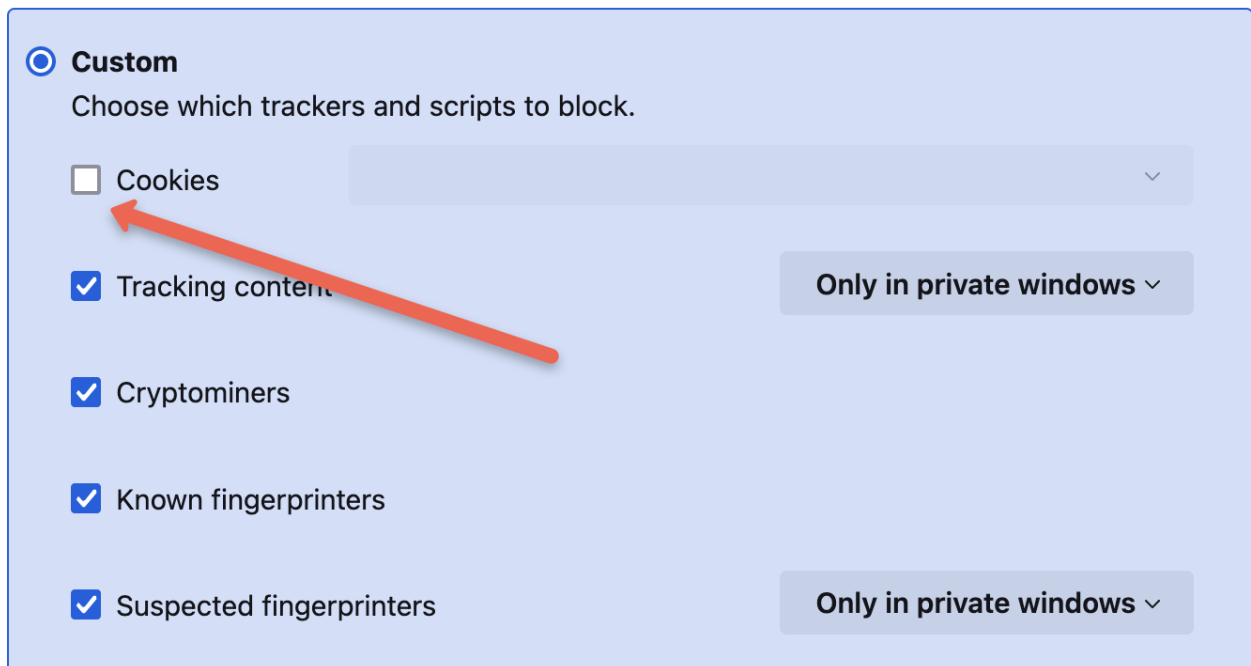

Choose Privacy & Security from the left sidebar

Under Browser Privacy, select Custom

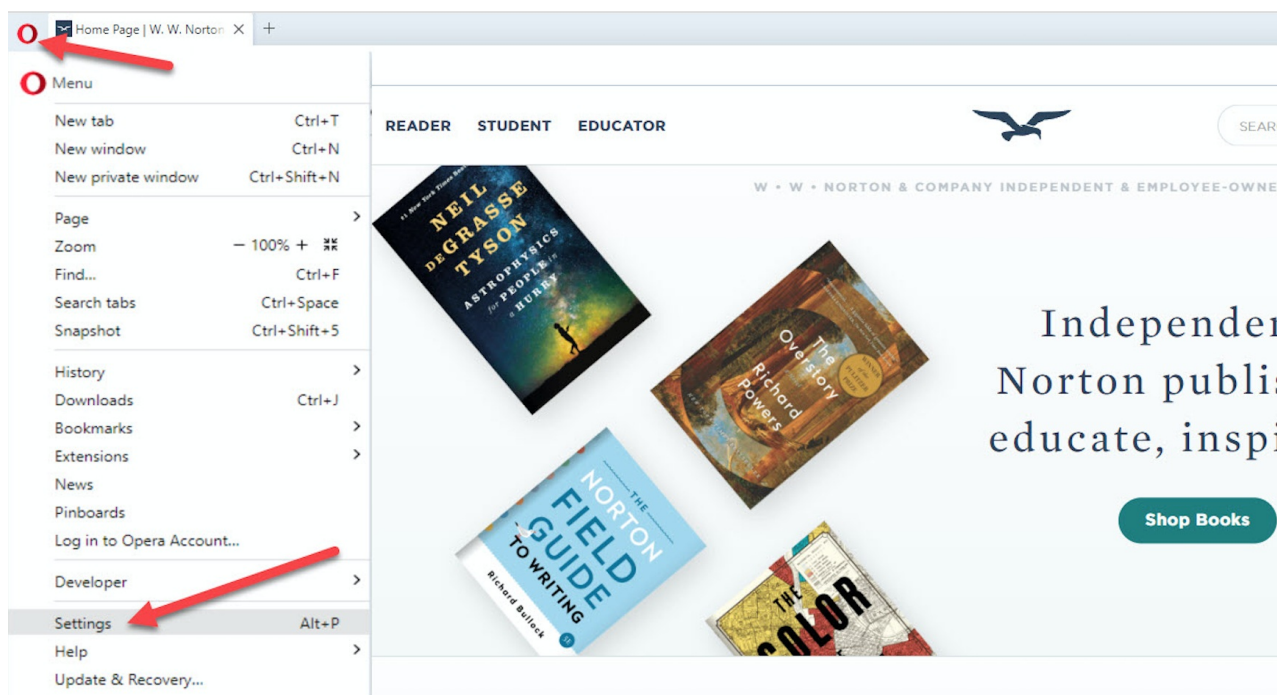

Uncheck the box next to Cookies

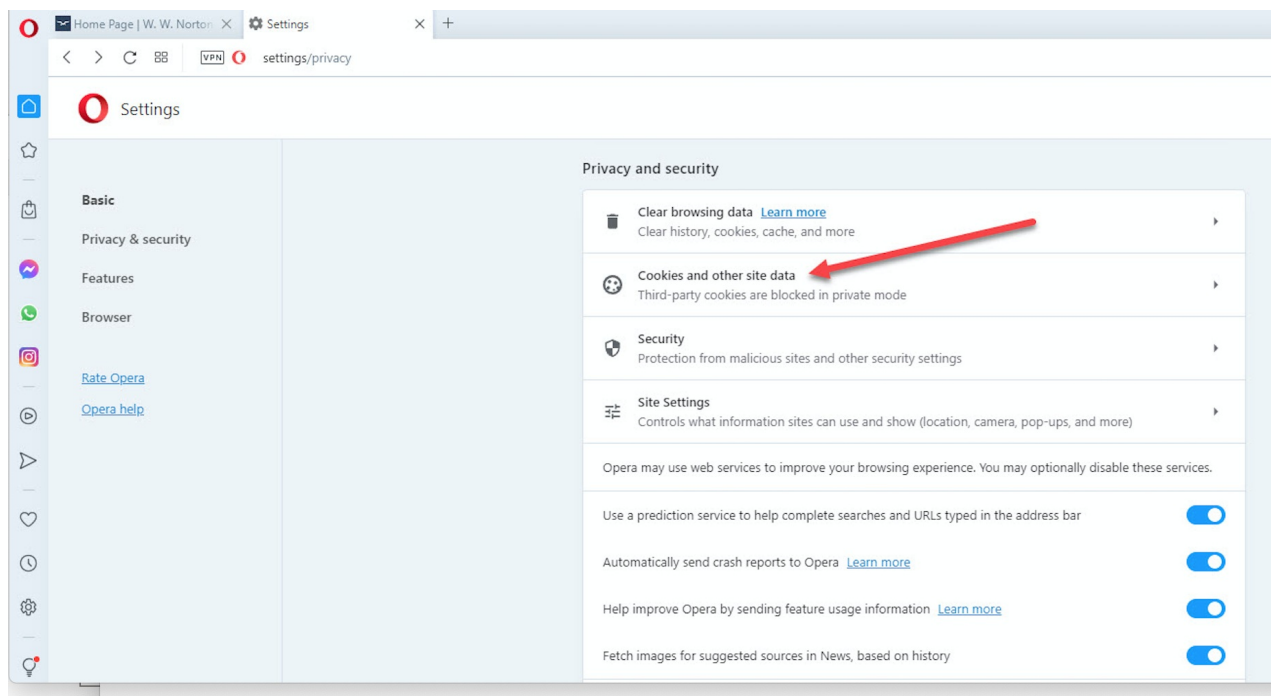

**PLEASE NOTE:** You will need to reload your browser tabs to apply settings changes.

# Mac/Opera

Click on the Opera menu in the upper-left corner of the screen and select Preferences from the menu.

Select the Privacy & security section, locate the Cookies heading, and make sure Allow local data to be set (recommended) is selected.

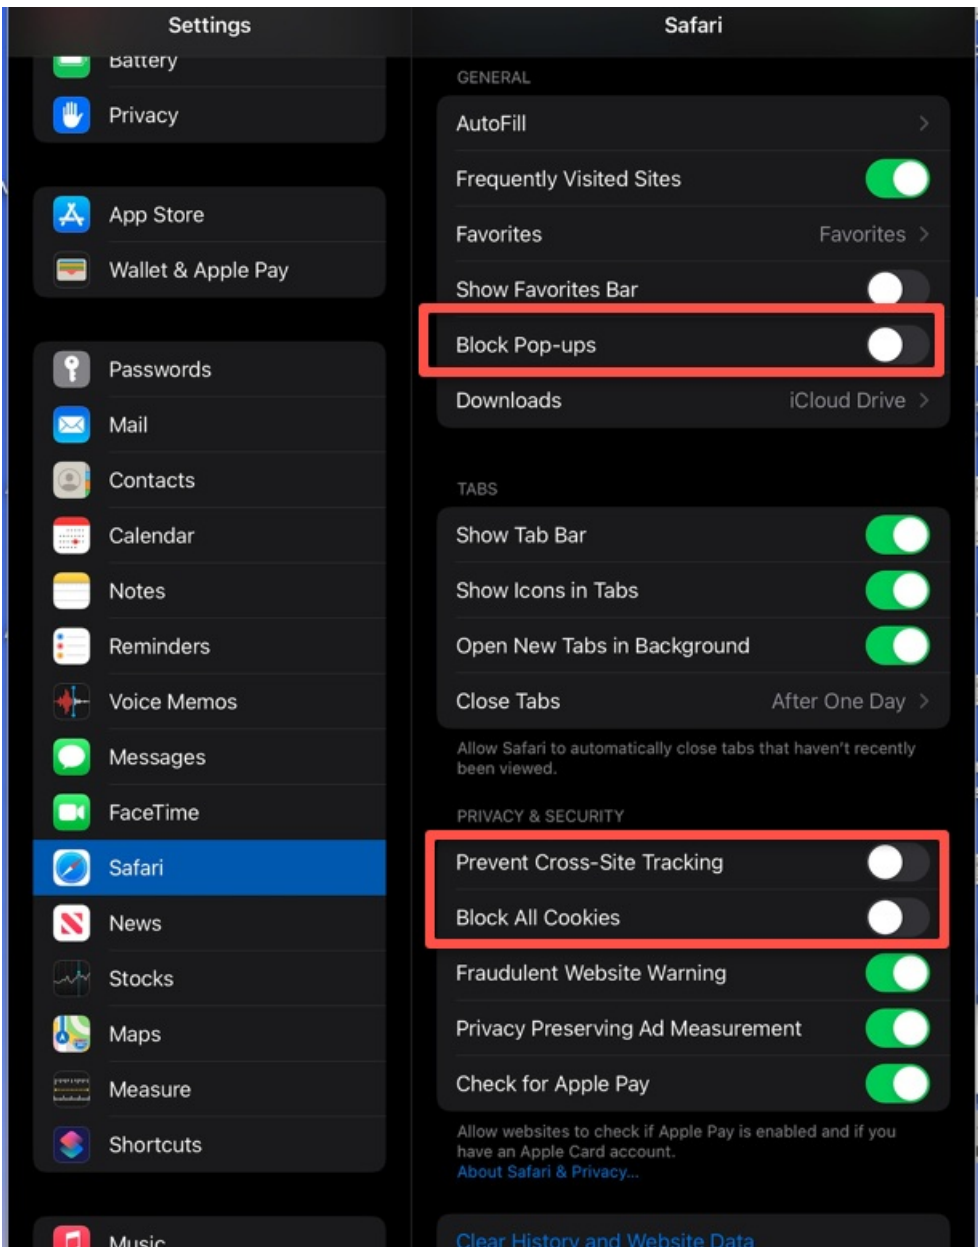

Under General Settings select Allow all cookies

## iOS/Safari

Open the Settings app.

Select Safari from the list on the left and tap on Block Cookies in the list on the right.

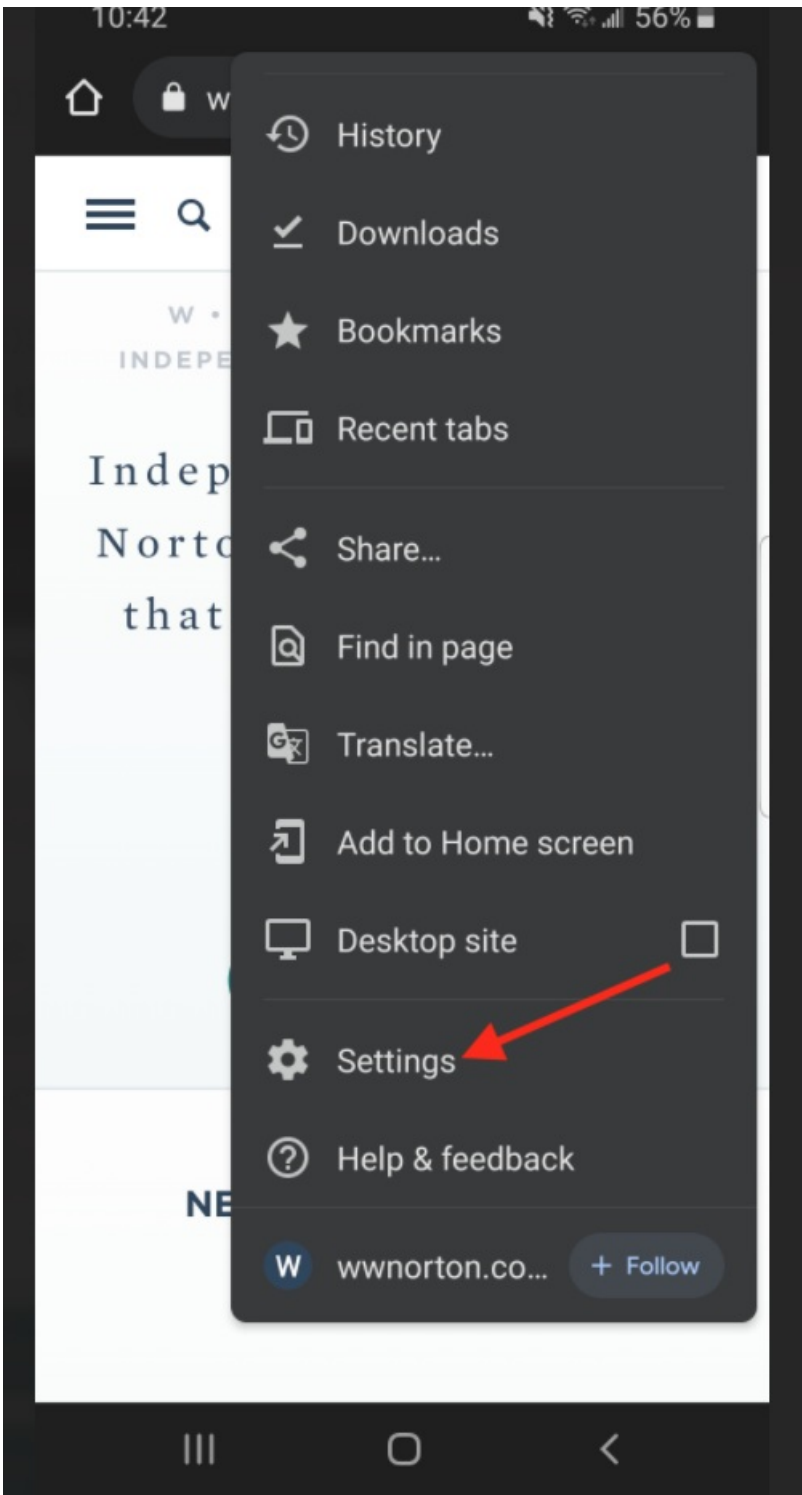

## Android/Chrome

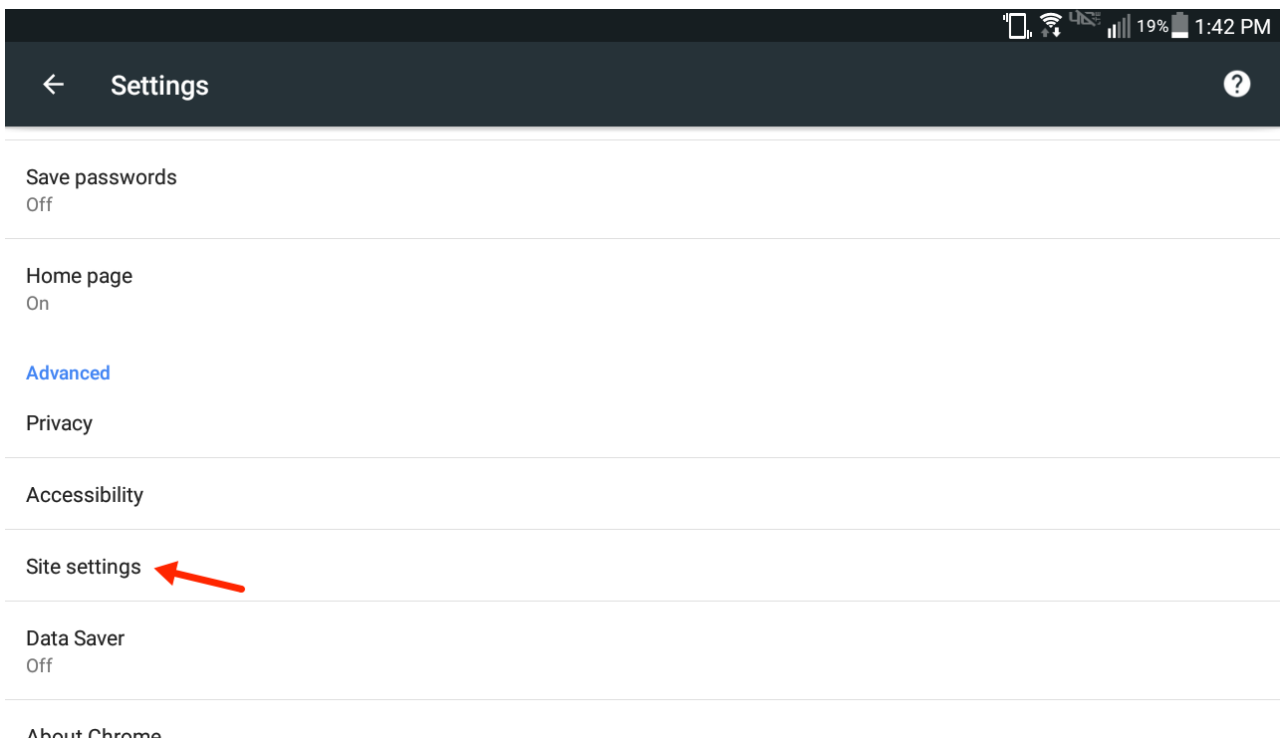

Tap on the menu icon in the upper-right corner of the screen.

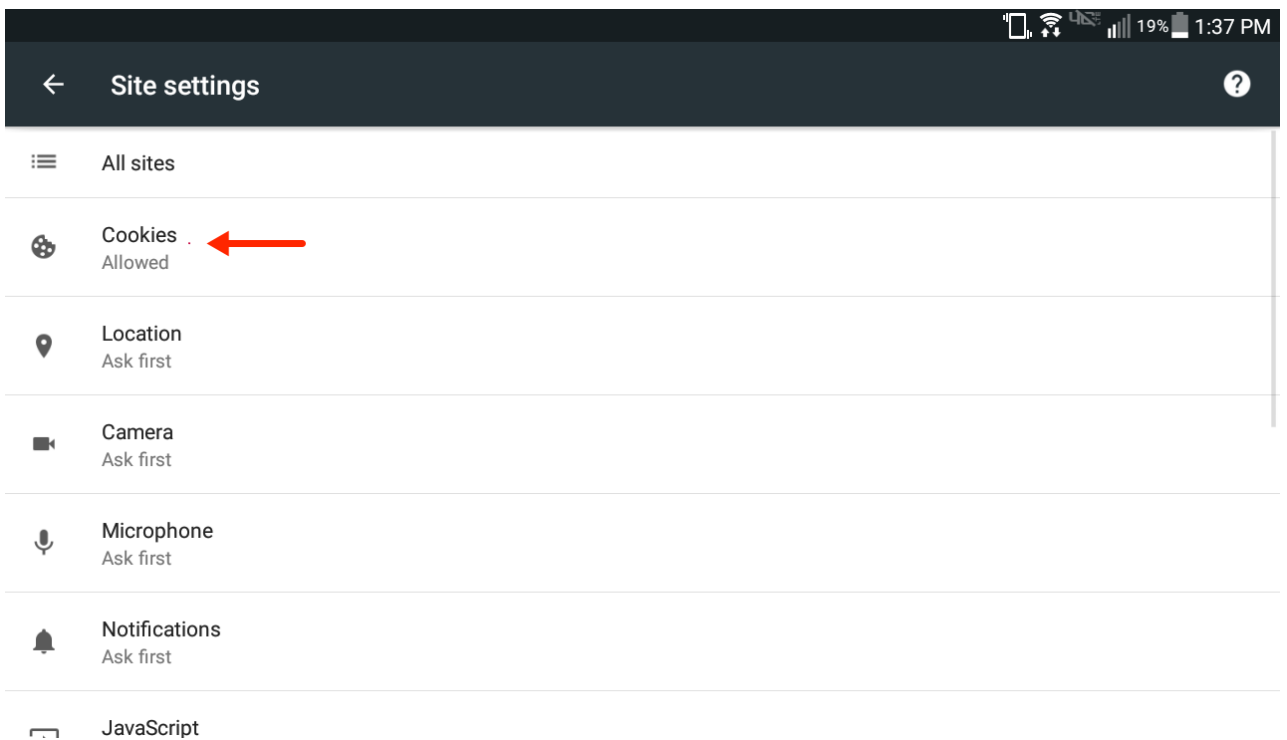

Tap on the Settings link in the menu.

Under the Advanced heading, tap on the Site settings link.

Tap on the Cookies link.

Make sure the switch is turned on (the switch is on the right side of the bar and the bar is blue, not grey) and the check box to the right of Allow third-party cookies is selected.
