

Instructor-only Functionality

Last Modified on 08/29/2025 11:25 am EDT

The Norton Ebook Reader has functionality that is exclusive to instructors. This page details the Norton Ebook Reader tools that allow instructors to share highlights and annotations with students, and to monitor class-wide reading activity.

Hide All Answers

Instructor Content

Instructor Content functionality allows instructors to create, edit, and publish shareable content with students. Not only can instructors share notes attached to selected ebook text, but they can also share images, videos, and links. A notable component of the instructor content feature is that it includes guidance and checkpoints for instructors, which will ensure they are sharing content with students that is accessible.

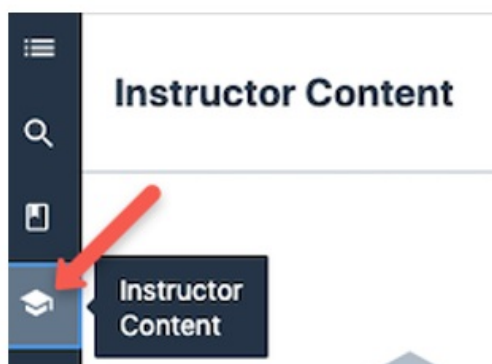

Students must first join the Student Set to view Instructor Content.

Instructor's personal notes and highlights that existed in the Classic Ebook Reader have automatically imported into the New Ebook Reader.

Please note: Shared highlights are not available in the New Ebook Reader since the green highlighter is now available to all users.

How to View Instructor Content

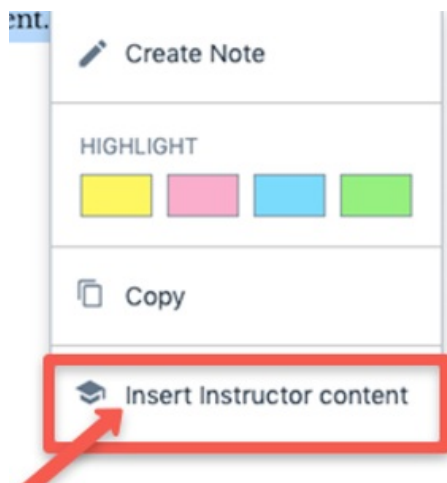

From the Ebook, click the Instructor Content icon (mortarboard hat) from the Context menu on the left side of screen.

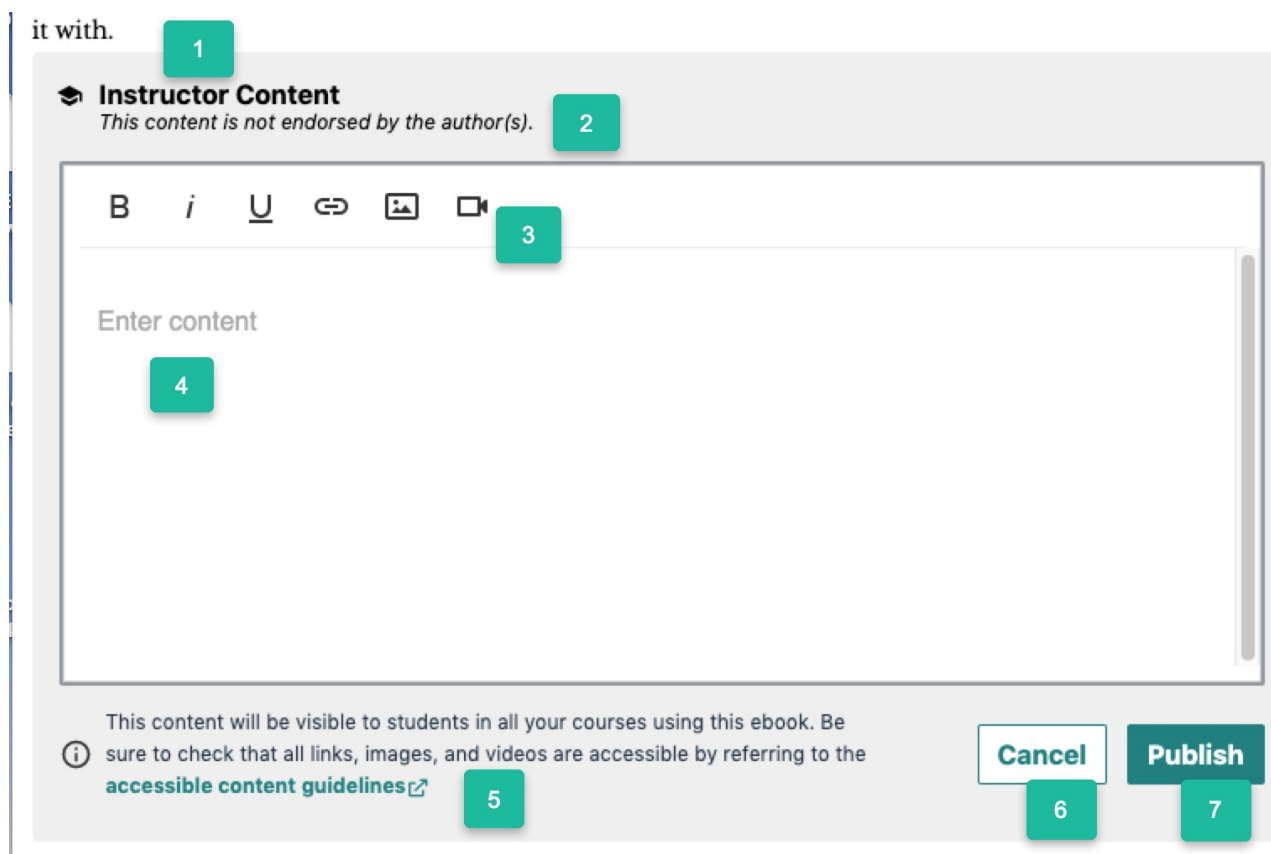

How to Create New Instructor Content

Adding Accessible Images, Videos, and Links

To ensure that content that you share is accessible to all students, please refer to the [Instructor's Guide to Accessible Content](#) 

Images* can only be added to Instructor Content as a Link Address (Right click on the website image and select Copy as Link Address).

**Image format must be .jpeg and .png*

To view instructions how to add an image to Instructor Content, please click [here](#).

Note: In order for students to view your Instructor Content, they need to be enrolled in your Student Set.

Can I monitor student and class-wide reading activity?

Instructors can monitor activity in three ways:

1. **Individual student reading activity:** After creating a Student Set and sharing the ID with students, you will have access to each student's reading progress.
2. **Class-wide averages for reading time per chapter:** In the Select a Student Set dropdown menu on your ebook homepage, select the Student Set for which you want to view reading time. Class-wide reading averages will then populate across from each chapter link. In the Active Students column, you'll see the number of students in your Student Set who have accessed the chapter. In the Avg. Time Spent (MM:SS) column, you'll see the average time spent for students who have accessed the chapter.

In the Role dropdown menu, select the permission level you would like to give the person who you are adding to your Student Set. For a comparison of the four different roles, please see the Overview of Role Permissions section below. Type in the person's email address and click the Lookup button.

1. If you are adding a co-instructor as a **Full Instructor**, the person must have a Norton account with full instructor privileges. For help with this, please contact your [Norton Representative](#).
2. If you are adding a **Teaching Assistant** or **Scoring Teaching Assistant**, the person does not need to have a pre-existing Norton account. In the case that they do not have a Norton account, we will send them an email with log in instructions once you add them to your Student Set.
3. If you are adding a student as a **Teaching Assistant** or **Scoring Teaching Assistant**, you are changing their permissions in all Norton products. If they are enrolled as a student in another Student Set, please have them register with a **separate email address** when logging in as a Teaching Assistant or Scoring Teaching Assistant.
4. Once you give an account a specific level of permission in your Student Set, you cannot downgrade that account to a lower permission level.
