Can I read my ebook offline?

If your ebook is available in the newest version of the Norton Ebook Reader, proceed to the steps below to enable sections of the ebook for Offline Reading.

Can I download the entire ebook for offline reading?

No. When you purchase an ebook from Norton, you are given access to an online, [accessible version of the textbook](#) in EPUB* format, not a downloadable file. You can choose to save parts of the textbook for offline reading through the new Norton Ebook Reader.

Offline reading uses storage built into internet browsers. This means that when you make parts of your ebook available for offline reading, you aren't downloading a file to your computer or mobile device.

If you require a file for accessibility reasons, please contact your school's disability support office to place a request for an alternative format. More information about alternative formats is available at <https://www.norton.com/accessibility/alternative-formats>

* *EPUB is the international ebook standard that enables features such as accessible text, media, and interactive materials that a PDF file can't support. Key benefits of using this standard include improved compatibility with assistive technology, automatic reflow with different font and screen sizes, and the ability to annotate and search the full text. Parts of the ebook I previously made available offline are no longer available offline.

- Offline reading uses storage built into internet browsers. This means that when you make parts of your ebook available for offline reading, you aren't actually downloading or saving anything to your computer or mobile device.

- Sometimes, when your browsing history is cleared, the parts of the ebook you've made available offline will be cleared and will no longer be available for offline reading.
- To make these sections available for offline reading again, you'll need to get back online and repeat the same process you used to make those selections available offline the first time.

Please Note: Media content (audio, video, animations, etc.) found in the ebook will only function with an active internet connection; those resources cannot be made available offline.
