

Getting Started as an Instructor with Smartwork

Last Modified on 08/06/2024 4:23 pm EDT

Smartwork is an online, self-graded homework system with interactive content designed to engage and challenge your students. Smartwork works on computers and tablets and integrates with the Norton Ebook Reader and other Digital Toolkit products. This page provides details on how to access Smartwork, and how to create student sets.

Hide All Answers

Logging in

To log in, go to the digital product's home page and select the Smartwork5 tile. Use your email address and Norton instructor account password.

The screenshot shows the digital resources page for 'Essentials of Geology' by Stephen Marshak. A modal window is open with the title 'Digital Resources for Essentials of Geology'. The modal asks 'Have you already registered for this product?' and offers two options: 'Yes, I want to sign in:' and 'No, I need to register, purchase, or sign up for trial access.' The 'Yes' option is selected, and the login form contains the email 'fbueller@wnorton.edu' and a masked password. A 'Sign In' button is visible. Below the modal, there are five tiles: 'Ebook', 'Smartwork5', 'Student Site', 'Guided Learning Explorations in Physical Geology', and 'Guided Learning Explorations in Physical Geology (Demo Area)'. The 'Smartwork5' tile is highlighted.

Creating Student Sets

What are Student Sets?

A Student Set is your class section. Student Sets allow you to view the work and results completed by a particular group of students.

Creating Student Sets

There are two ways for you to create a Student Set: from scratch, or you can create a new Student Set that is based on an existing Student Set.

Basing your new Student Set on an existing one allows you to copy any assignments that you use in one Student Set into another Student Set. You may want to create a Student Set based on an existing Student Set if you are teaching multiple sections of the same course. Furthermore, if you and another instructor are both teaching different sections of the same course, you have the option to base your Student Set off of the other instructor's Student Set.

Creating a Student Set from Scratch

To create a Student Set from scratch, do the following:

1. After you log in, go to the gear menu in the upper right corner of your screen and click "Manage Student Sets." You may manage Student Sets from the digital landing page or from the Smartwork page (below is an example from a Smartwork page).

The screenshot shows the SMARTWORKS interface. At the top, there is a navigation bar with "Digital Resources" and "SMARTWORKS". Below this, the course "Essentials of Geology, SIXTH EDITION" by Stephen Marshak is displayed. A user menu in the top right corner includes options like "Manage Student Sets", "Show Student View", "Export Content to LMS", "Help", "Change Your Email", "Change Your Password", and "Sign Out". A dropdown menu shows "445454 (Topics in Transfiguration MWF)" and buttons for "Export This Data", "Student Grades", and "Create New Assignment".

ASSIGNMENT TITLE		PUBLISHED	GRADES ACCEPTED UNTIL	EXTRA CREDIT	SUBMITTED GRADES	AVG. TIME SPENT (MM:SS)	AVG. GRADE
Prelude Reading Quiz	EDIT COPY DELETE	<input type="checkbox"/>	—	<input type="checkbox"/>	—	—	—
Prelude Activity	EDIT COPY DELETE	<input type="checkbox"/>	—	<input type="checkbox"/>	—	—	—
Ch 01 Reading Quiz	EDIT COPY DELETE	<input type="checkbox"/>	—	<input type="checkbox"/>	—	—	—
Ch 01 Activity	EDIT COPY DELETE	<input type="checkbox"/>	—	<input type="checkbox"/>	—	—	—
Ch 02 Reading Quiz	EDIT COPY DELETE	<input type="checkbox"/>	—	<input type="checkbox"/>	—	—	—
Ch 02 Activity	EDIT COPY DELETE	<input type="checkbox"/>	—	<input type="checkbox"/>	—	—	—

2. In the window, click the "Create New Student Set" button, located in the top-right corner.

The screenshot shows the "Manage Student Sets" window. It includes a search bar, a table with columns for ID, Title, Additional Instructors, Students, Start Date-End Date, and Actions. A "Create New Student Set" button is highlighted with a red box in the top right corner. Below the table, it says "Showing 0 to 0 of 0 entries" and provides contact information for Norton Customer Support.

3. You will see a window that asks you whether you want to create your Student Set from scratch (option 1), or if you want to base your student set off of an existing student set (option 2). Select "Create a new Student Set from scratch."
4. Enter a title for your Student Set.
5. Select your state, province, or country. Then select your school type and school affiliation.
6. Select the start and end date for your course.

Create a New Student Set

General Information

Title:

Country:

State/Province:

School Type: College
 High School

School Name:

Start and end date of the course this Student Set will be used for:

Start Date: 12:00 AM Eastern Time End Date: 11:59 PM Eastern Time

Optional Settings

Students cannot self-enroll days after the Start Date

Do you want your students to enter a campus or school ID when they register? Yes No

For assistance, please contact your Norton representative or [W. W. Norton Customer Support](#).

7. Click "Create Student Set." Make a note of the Student Set ID number. You should distribute this to students so they can add themselves to your Smartwork course upon registering.

Manage Student Sets ✕

Student Sets allow you to view **grades** and **performance analytics** for your students. [\[Learn More\]](#)

Search:

ID	Title	Additional Instructors	Students	Start Date-End Date	Actions
445454	Topics in Transfiguration MWF	—	0	2021/01/01–2021/12/31	<input type="button" value="Update"/>

Showing 1 to 1 of 1 entries

For assistance, please contact your Norton representative or [W. W. Norton Customer Support](#).

School/Campus ID

You can require your students enter a School/Campus ID, which will then be attached to their grade exports. You'll see students' IDs included in these grade report interfaces in Student Grades, and in the CSV export of grades you can download there.

- Note: If you are integrating Norton products directly with a campus Learning Management System (LMS), this ID field will exist within the Norton product only. It will **not** be synchronized with the student record in the LMS.

When you create a Student Set, look for the option in the interface that says: "Do you want your students to enter a campus or school ID when they register?" Click "Yes" and a field will appear where you can define what the ID itself is called. When you activate this setting, students will be prompted to enter the ID when they enroll in your Student Set.

The default name is "School ID." You can call this whatever will be clearest to your students; this is sometimes called a Student ID. If a student doesn't enter their School ID right away, they can still access and work on the activities normally. But each time they log in, they'll see another prompt to enter the ID.

- Note: If a student enters an incorrect ID, they won't be able to change it. If this occurs, you or a Teaching Assistant can correct their record in the Manage Student Set interface.

Creating a Student Set Based on an Existing Student Set

To create a Student Set based on an existing Student Set, do the following:

1. After you log in, go to the gear menu in the upper right corner of your screen and click "Manage Student Sets."

Removing Students from Your Student Set

You may wish to remove students who have dropped the course from their Student Sets so that reports align with your current rosters. Removing a student will also permanently delete that student’s grade record. **Note: This action cannot be undone.**

To remove a student, start by clicking on the gear in the upper right corner of your screen and selecting “Manage Student Sets.”

The screenshot shows the SMARTWORKS interface for 'Essentials of Geology, Sixth Edition' by Stephen Marshak. The user is logged in as fbuellet@wnorton.edu. A dropdown menu is open, with 'Manage Student Sets' highlighted. Other options include 'Show Student View', 'Export Content to LMS', 'Help', 'Change Your Email', 'Change Your Password', and 'Sign Out'. Below the menu, there are buttons for 'Export This Data', 'Student Grades', and 'Create New Assignment'. A table lists assignments with columns for 'ASSIGNMENT TITLE', 'PUBLISHED', 'GRADES ACCEPTED UNTIL', 'EXTRA CREDIT', 'SUBMITTED GRADES', 'AVG. TIME SPENT (MM:SS)', and 'AVG. GRADE'. The table contains rows for 'Prelude Reading Quiz', 'Prelude Activity', 'Ch 01 Reading Quiz', 'Ch 01 Activity', 'Ch 02 Reading Quiz', and 'Ch 02 Activity'.

In the window that pops up, locate the Student Set you would like to edit and click “Update.”

The 'Manage Student Sets' pop-up window shows a search bar and a 'Create New Student Set' button. Below is a table with columns: ID, Title, Additional Instructors, Students, Start Date-End Date, and Actions. One entry is visible with ID 445454, Title 'Topics in Transfiguration MWF', 0 students, and a date range of 2021/01/01-2021/12/31. The 'Update' button in the Actions column is highlighted with a red box. Below the table, it says 'Showing 1 to 1 of 1 entries' and provides contact information for Norton support.

All of the students of that Student Set are located in the Students tab in the Members area.

Note for those who integrated Smartwork into your campus Learning Management System: Removing students from your Student Sets will not remove them automatically from any class rosters you have in your LMS. If you want to also remove your student's access to those course materials, you'll have to do so within the LMS.

Frequently Asked Questions

How do students register for Smartwork?

Students can access Smartwork by one of three ways:

1. A Smartwork registration code comes for free with new copies of select Norton textbooks. Contact your Norton Representative to ensure you've ordered a version of your textbook that comes with Smartwork access.
2. Students can purchase access to Smartwork online.
3. Students can access Smartwork for three weeks through trial access. At the end of three weeks, students will have to enter a registration code or purchase access online.

Note: Once students have begun work within Smartwork in a registered account, it will not be possible for work to be transferred to another account. Please remind students of the following:

"Please use the email address issued to you by your school, if you have one. Once you have set up your account, you will not be able to transfer any of your work or grades to an account set up with a different email address."

How do students join my Smartwork Student Set?

After registering for Smartwork, students can add themselves to your Student Set by doing the following:

1. After logging in to their Smartwork account, students should go to the gear menu located in the top right corner of their screen.
2. Students should click on "Add yourself to a Student Set."

The screenshot shows the top navigation bar with the W. W. Norton & Company, Inc. logo and the text "DIGITAL RESOURCES". Below the logo is the book cover for "Essentials of Geology, Fifth Edition" by Stephen Marshak. To the right of the book cover, the text "Essentials of Geology" and "FIFTH EDITION" is displayed, followed by the author's name "Stephen Marshak". In the top right corner, the user's name "jryan@wwnorton.edu" is shown. A gear menu is open, displaying several options: "Add Yourself to a Student Set" (highlighted with a red box), "Help/FAQ", "Change Your Password", and "Sign Out".

3. Students will be prompted to enter in the ID number of the Student Set they would like to join in a separate window. Once they enter the Student Set ID and click OK, they will have access to all of the assignments created by their instructor.

If your instructor has given you a 5-digit Student Set ID number, enter it here:

Student Set ID:

Your activity results will be saved even if you haven't joined a Student Set. **But unless you're only using the activity for self-study, you need to join a Student Set for your instructor to see your grade.** Once you *do* join a Student Set, your results will instantly be visible in your instructor's activity report.

What happens to student grades when they complete work after the due date?

If you have set a Late Work Period for an assignment, you can set the exact percentage they will lose for every day

after the Grades Accepted Until date. During this period, they can continue working to raise their grades, but for that smaller percentage of the original possible score.

Late work in an *Adaptive* assignment does NOT contribute to the points a student earns. This is different from the way that non-Adaptive assignments work: non-Adaptive assignments do not allow students to submit work after the final due date (without a Late Work Period set), but Adaptive assignments do. While students may see their Mastery level go up in those cases, their point score will not change.

Which devices and browsers are best for accessing Smartwork?

Smartwork works on desktop and laptop computers and tablets. Smartwork is not supported on smartphones. If you are an instructor who is editing and authoring questions for use in your Smartwork assignments, we recommend doing so on a desktop or laptop computer.

Smartwork is compatible with the following browsers:

- Chrome version 124 or higher
- Firefox version 126 or higher
- Safari version 16.5 or higher
- Edge version 126 or higher

Tablet Android:

- Mozilla Firefox (129 or newer)
- Google Chrome (127 or newer)

Don't know your Operating system version? Here's how to find it: [Mac](#) / [Windows](#)
