

Viewing a Test in Different Ways

Last Modified on 07/01/2024 4:36 pm EDT

Norton Testmaker lets you view your test in three different formats.

Build

"Build" is the default view. This view displays all of the details of the questions in your test, including: question stem, answer choices, and metadata. You can add/remove questions and edit the "Test Header" in this view.

The screenshot shows the 'Build Test' interface in Norton Testmaker. The top navigation bar includes 'Testmaker', 'Build Test', and the user email 'sshakya@wnorton.com'. The main area is divided into two panels. The left panel, titled 'Add Questions', shows a search bar, filter buttons for 'MULTIPLE CHOICE' and 'Moderate', and a list of '2211 Questions' with 'Undo' buttons. The right panel, titled 'Build Test', shows a 'Test Header' for 'Midterm Principles of Economics' with 10 questions. Below this is 'Question 1' with the stem 'Economics is the study of' and five multiple-choice options. Option 'b. how to allocate resources to satisfy wants and needs.' is selected with a checkmark. At the bottom right, there are 'Export' and 'Save' buttons. A red arrow points to the 'View' menu which includes 'Build', 'List', and 'Preview' options.

List

Questions are collapsed by default in this view. You can expand individual questions to view details like answer choices and metadata. You can add/remove questions, edit the "Test Header," and reorder questions by dragging and dropping them within the question list.
