

# Saving a Test

Last Modified on 07/01/2024 4:37 pm EDT

Tests can be saved at any point. Tests also auto-save when edit actions are performed (e.g., adding, removing, and reordering questions).

1. Click the "Save" button at the bottom of the screen. Your test will be saved and its modified date will be updated in the "Your Tests" page.

The screenshot displays the 'Build Test' interface in the Testmaker application. The top navigation bar includes 'Testmaker', 'Build Test', and the user email 'sshakya@wnorton.com'. On the left, the 'Add Questions' panel shows a search bar, filter buttons for 'MULTIPLE CHOICE' and 'Moderate', and a list of '2211 Questions'. The main area shows a preview of a test titled 'Midterm Edit' with 10 questions. The first question is visible, asking about the study of economics. At the bottom right, there are 'Export' and 'Save' buttons, with a red arrow pointing to the 'Save' button.
