How do I import Resources for Your LMS to Brightspace/D2L?

Last Modified on 08/01/2024 10:03 am EDT

RLMS files are integrated course content packages to easily add high-quality Norton digital resources to your online, hybrid, or lecture courses. Norton provides these packages for D2L/Brightspace.
To access book specific resources, first locate your book by discipline and title from here.

For this course to function properly, you will need to ensure that LTI integration is enabled and supported on your school's learning management system. If you are unsure, you can contact your local D2L/Brightspace administrator and ask if Norton is an LTI tool provider at your school. If Norton is not yet an approved tool provider, please contact your local Norton representative for assistance. Find your representative here.

Resources for your LMS (RLMS) is a D2L/Brightspace Course Export Package file. To add these resources to your D2L/Brightspace course, you will import the package file to a blank shell.

D2L/Brightspace - RLMS file import

- Download the package file from the Instructor Resource page for your text by selecting the download button beside the D2L/Brightspace Resources.
- Do not unzip or extract any content from the file.
  - The file must have the .zip extension to import to D2L/Brightspace.
- Log into your course shell in D2L/Brightspace and navigate to the *Content* tab.
- From the *Table of Contents* tab; use the *Import Course* tab to access the link to *Import Course Package.*
- Upload your course export package file by browsing your desktop for the saved zip file.
- Click on *Import All Components.*
- Confirm your import selections and then click the second *Continue* button.
- When the process is finished, click *View Content* to access the course material.

Next Steps

- In order to complete your course set up, you must create a Student Set for your Norton product. Steps to get you started can be found here: Create a Student Set

Reporting error messages

Please take a screenshot and/or copy the text from the error message and contact W. W. Norton Customer Support for assistance. A support specialist will contact you to assist with further troubleshooting.
