

Grading and Reports

Last Modified on 03/24/2026 6:41 am EDT

Tutorials collects and presents to instructors detailed class and individual student results and activity data. This page provides instructor instructions with annotated illustrations on how to access this data online and export it.

Hide All Answers

How does grading in Tutorials work ?

As Tutorial assignments are designed for low-stakes practice with particular skills, they are graded at 100% for completion, no matter how the student performs. Students have to complete each question to proceed through the steps, but they do not have to get them correct.

Instructors who want more accountability have the ability to review the answers and adjust the overall score using the Override Grade tool. This can be done through the Class Activity Report.

Student Submission Report for Lisa Simpson-MKECQ
(lsimpsonmkecq@evergreener.edu)

Export Submission Data

- Completion Date: **07/01/21 01:09 PM**
- Current Grade: **0%** † [How are grades calculated?]
- Time Spent: **4:28**

† This student's grade at the time the Grades Accepted Until date passed was 0%. This is the grade that will be exported, and is the grade submitted to your LMS if you are using LMS integration. The student kept working after the Grades Accepted Until date, and his/her current grade is 100%. You can override the student's grade here if you wish.

Return to Class Report

Students see messaging about their instructor's ability to adjust grades at the beginning and end of each tutorial activity.

Messaging provided at the beginning of an assignment:

HOW SCORES ARE CALCULATED

You must complete all tasks in this tutorial to receive a 100% completion score.

If this workshop has been assigned by your instructor, make sure that you have joined your instructor's student set. You can join a student set by clicking the gear menu at upper right.

Your score and responses will be recorded for your instructor to see; your instructor may adjust your score as they see fit. You can leave the tutorial at any time, and your work will be saved when you return.

Messaging provided at the end of an assignment:

Conclusion

Great work! You've now completed the Sociological Writing Tutorial: Organizing Your Ideas, with a completion score of **100%!***

Once you organize your outline, begin to write. Don't worry about grammar and style in early drafts; instead, focus on getting your thoughts on paper and make revisions and adjustments later. Remember, writing is a process. You should go through many drafts. Getting your ideas organized from the start is a great way to begin.

**Note this is a preliminary score. Your instructor may read your written responses and adjust your score accordingly.*

How do I view my Average Student Set Results?

To view average results for your Student Sets, on the activity list, click on the Select a Student Set dropdown menu and choose a specific Student Set.

HOW SCORES ARE CALCULATED

Students automatically earn 100% for completing all the tasks in the activity. You can review students' written responses and adjust their scores manually in your Class Activity Report.

Here is a breakdown of a student's question response:

1. The question displayed in the Tutorial assignment.
2. Where your student's response will be displayed.
3. You can provide additional comments about this question here. Students will see your comment when they click back through the activity.

Here is what your students will see in their activity:

Question 2 of 2

If you were at the street performance as an ethnographer, what is one part of the scene that you would describe in elaborate detail in your field notes? Why did you choose this part of the scene?

Student Response Shown Here

Your answer has been submitted.

- Grade given by instructor: **100%** (10 / 10)
- Instructor comment: instructor comments will be displayed here.

How do I clear a student's submission and reset their grade?

Here's how to completely clear a student's submission and reset their grade:

Navigate to your Class Activity Report (CAR) by clicking the Reports button. If none of the students in the selected Student Set have attempted an activity yet, the Reports button will not be visible.
