# LMS Integration

Tutorials can be integrated into a Learning Management System (LMS) course such as Blackboard, Moodle, Canvas, or D2 for single sign-on and grade passback. However, open ended responses will not be visible from your LMS gradebook. You must navigate to the Class Activity Report (CAR) from the Digital Landing Page (DLP) to see your students' written responses.

Only the final submission grade will pass back to the LMS gradebook.

If Tutorials are integrated within your campus LMS, your students will not be asked to join a Student Set if they launch the activity using an integrated link within your LMS course. After students log in the first time when using an LMS-integrated link, they will be automatically added to the proper Student Set.
