LMS Integration

Tutorials can be integrated into a Learning Management System (LMS) course such as Blackboard, Moodle, Canvas, or D2L for single sign-on and grade passback. Open ended responses will not be visible from your instructor's gradebook, but your instructor will still be able to view them through the Digital Landing Page.

Only the final submission grade will pass back to the LMS gradebook.

If Tutorials are integrated within your campus LMS, you will not be asked to join a Student Set if you have launched the activity using an integrated link within your LMS course. After you log in the first time when using an LMS-integrated link, you will be automatically added to the proper Student Set.
