Guidelines for instructors

Inclusive Access (IA) or Equitable Access (EA) programs are designed to provide students access to their required course materials on or before the first day of class. Norton's high-quality digital course materials are delivered automatically via links in the Learning Management System (LMS) at the best possible price, providing all students with immediate access to their course materials.

Course set up is the same as any other integrated course, so you can follow any of our standard options for setting up your integrated LMS course.

- **ADD Link to Integration for Canvas**

- **ADD Link to Integration for Blackboard**

- **ADD Link to Integration for Desire2Learn**

- **ADD Link to Integration for Moodle**

When your students launch into your Norton course material, they will be automatically registered and granted access. No codes, no registration, no waiting. You can view videos of the student registration process here [link back to student videos in Norton-delivered section].

If you need additional support from Norton, you may open a ticket here.
