Using My Materials / Launch Courseware

The VitalSource launch page is an easy and consistent way for students to access course content. Students launching from the VitalSource landing page will be taken directly to their course resources from day one, with no set up required by you.
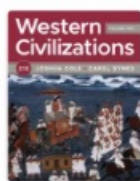

1. From your Learning Management System course, your student **navigates to the VitalSource course materials landing page**. It might be called Inclusive Access, My Materials, My Courses, or something specific to your program.

2. Student **clicks a button to launch their course materials**, which will be integrated in your course on or before the first day of class. The button might be called **Launch Courseware**, **Open**, or something specific to your LMS.

25F-HIST-1C-LEC-1 Introduction to Western Civilization: Circa 1715 to Present

Western Civilizations (Volume 2) (with Norton Illumine Ebook, InQuizitve, History Skills Tutorials, Exercises, and Student Site)
